# Control your wholesale data center without going it alone.

You're accountable for the performance of your data center, so you need full control over your data and the hardware behind it. Choosing the right building, cooling and power in the right location is a good start. But do you have the peace of mind and peak performance that comes from having a qualified team of experts on your side?

Flexential wholesale IT services deliver peace of mind and peak performance.

We merge next-level design innovation with forward-thinking IT solutions that are tailored to the unique needs of your applications, customers and business. From 24/7 on-site support and Remote Hands migration support to resiliency and security measures like Incident Command System (ICS) procedures, "Go-Team" systems, and auxiliary resources activated ahead of weather events, we've got you covered – and then some. And all this support brings peace of mind in knowing you've got the backing of the "A-team."

Be a data center rock star

With Flexential as your partner, you can take your data center performance to a whole new level. With 100% uptime guarantee as your baseline, we'll help you leverage the full power of your data to realize your business potential. With "one-hop-from-anywhere" and edge computing to reduce latency, plus access to your end users of tomorrow in 21 diverse domestic and international markets, your data center isn't just adequate. You're killing it.
