

Considered the connectivity gold standard, and pledging to reach carbon neutrality by 2030: HARTING Technology Group prioritizes human and global environmental factors when innovating and co-creating – using GreenLine labels to designate products as environmentally sustainable with CO<sub>2</sub> transparency.

“The key to communicating our CO<sub>2</sub> emissions transparently and recognize potential for reduction lies in the **automated calculation and the granularity of the data** provided by SAP Sustainability Footprint Management.”

**Dr. Stephan Middelkamp**, General Manager, Quality and Technology,  
HARTING Technology Group

## In a nutshell

Scaling SAP Sustainability Footprint Management enabled the automated calculation of 13,000 materials, -- enabling a verifiable “one-click solution” for carbon footprint requests, simplifying scope 3 reporting, hot spot identification, and bidding processes.
