

As Germany's largest dairy coop, DMK provides millions with high-quality, sustainably produced food. Prioritizing quality, diversity, and innovation enables continuous product adaptation to meet evolving customer needs. **Cultivating a sustainable future** means "making the most of our milk."

**"Sustainability is playing a big role right now.** A lot more will be happening with packaging in the future. Our customers' satisfaction is our highest priority; we keep thinking about what else we can optimize or do more efficiently. Making sure our success is measured is a priority.

**Ingo Müller, CEO**  
DMK Group

## In a nutshell

A holistic approach to sustainability supported a seamless integration of SAP Sustainability Footprint Management into its existing SAP ERP landscape, allowing data sharing/reuse, producing accurate PCF calculations and access to more comprehensive reporting and analytics.
