

With complex packaging requirements under extended producer responsibility (EPR) regulations pending, ArcelorMittal—one of the world’s leading integrated steel and mining companies—needed a scalable solution designed to maintain pace with global mandates and accelerate Packaging and Packaging Waste Regulation (PPWR) readiness.

“Thanks to SAP Responsible Design and Production, we’ve mitigated risk around packaging reporting regulations by digitalizing the accurate calculation of packaging fees and taxes across global markets.”

Nik Puri, Group CIO and CISO, ArcelorMittal S.A.

In a nutshell

SAP Responsible Design and Production enabled ArcelorMittal to automate fee calculations and go “far beyond regulatory reporting” – giving teams smarter insights that transformed their jobs “from complexity to clarity” – and ultimately, optimized their packaging material decisions.

SAP offerings
