

Ambipar Group: Creating Net Zero as a service

Driving a net zero economy is at the forefront of Ambipar Group's ambitious business strategy. As a global leader in environmental management, Ambipar is well-positioned to advance CO₂e emissions offset solutions. With shared goals, SAP and Ambipar unveiled Net Zero as a Service, a user-friendly carbon offset platform for eco-conscious companies.

Ambipar aspires to make net zero achievable for all with its carbon offset platform, Ambify.

The power of circularity: Ambipar’s approach to decarbonization

Before: Challenges and opportunities

- Develop and manage energy generation projects and provide clients with clean energy alternatives
- Manage ESG (Environmental, Social, Governance) data and natural resources on a unified foundation
- Enhance sustainability metrics and reporting by integrating and streamlining operations

Why SAP and Lab2dev

- GROW with SAP, a cloud-based, ERP-centric solution, offered a quick, secure, and cost-effective implementation
- Lab2dev facilitated and supported the company’s digital transformation using the Clean Core concept – an SAP strategy for simplifying and improving SAP system management
- Leverage the synergistic dynamic between Ambipar and SAP via Net Zero as a Service – a seamless integration of Ambipar’s carbon offset platform, Ambify, and SAP Sustainability Control Tower

After: Value-driven results

- Piloted Net Zero as a Service in its own operations and scaled to hit aggressive growth targets
- Used unified data foundation to leverage an interconnected ecosystem that supports its sustainability strategy across all business functions
- Built a strong, end-to-end carbon management platform via newly generated data and innovative business models

“By combining SAP technology with Ambipar’s decarbonization expertise to create Net Zero as a Service, customers will have **access to a simple, comprehensive solution** that contributes to a low carbon economy.”

Tercio Borlenghi Jr., CEO, Ambipar

3 weeks

to complete stage one of its sustainability implementation

7.51%

reduction of greenhouse gas emissions compared to 2022
