

RELIABILITY SOLUTIONS

NRG's business is protecting yours — by providing extraordinary dependability and best-in-class support.

What it is

There's no time for downtime. Prepare your facility for any scenario. In an era of bigger storms, rising demand, and a less stable grid, we provide customers with mission-critical assets at their facility for backup power.

Reliable, efficient, cost-effective backup power delivered instantly is a must for businesses hoping to mitigate risk and manage electricity demand. Your facility's backup generation system is far more than a powerful line of defense. It's a gateway to enjoying reduced energy rates by making use of behind-the-meter load reduction capabilities.

How it works

Our reliability solutions include:

- 1 Thorough assessment of your facility's location, utility, load, existing behind-the-meter systems, environmental factors, and unique needs
- 2 Procurement, engineering, development, permitting, installation, operation, and system maintenance
- 3 Full-service operation and maintenance, including monitoring, environmental compliance, maintenance, repair, and replacement

RECOMMENDED FOR

C&I customers that own or lease:

- Manufacturing facilities
- Warehouses
- Medical facilities
- Data centers
- Commercial offices
- Grocery centers
- Municipalities
- Retail businesses

Businesses with a peak load of 500 kW or greater for a single site

KEY BENEFITS

- Increased operational reliability and productivity
- Opportunity for cost savings
- Full-service operation and maintenance
- Assurance of seamless operation without any upfront capital investment
