ABOUT ME

I am a more than eager creative and collaborative worker who is determined to work with other creatives who are working to make a story come to life through animation. I'm always willing to bounce creative ideas off of one another to create quality, collaborative work.

ANIMATION EXPERIENCE

● Official CSUN Kwanzaa Project

I was selected by my professor to gather research and pitch creative ideas for my portion of an official project for CSUN. I worked collaboratively to gather research and pitch ideas.

● Freelance Work

I have done freelance projects for an online dungeons and dragons series called Just Roll With It. I've worked collaboratively with both the show runners and other artists.

● College Courses

I've taken several pre-production classes in the latter half of my college career with a set of given expectations: compelling composition, character acting, timing, and the usage of class taught material. I've created a total of seven animations/storyboards in these classes and have completed each of these 4 courses with an A.
