

Innovating at the Speed of the Customer.

It's time for a broader,
bolder vision.

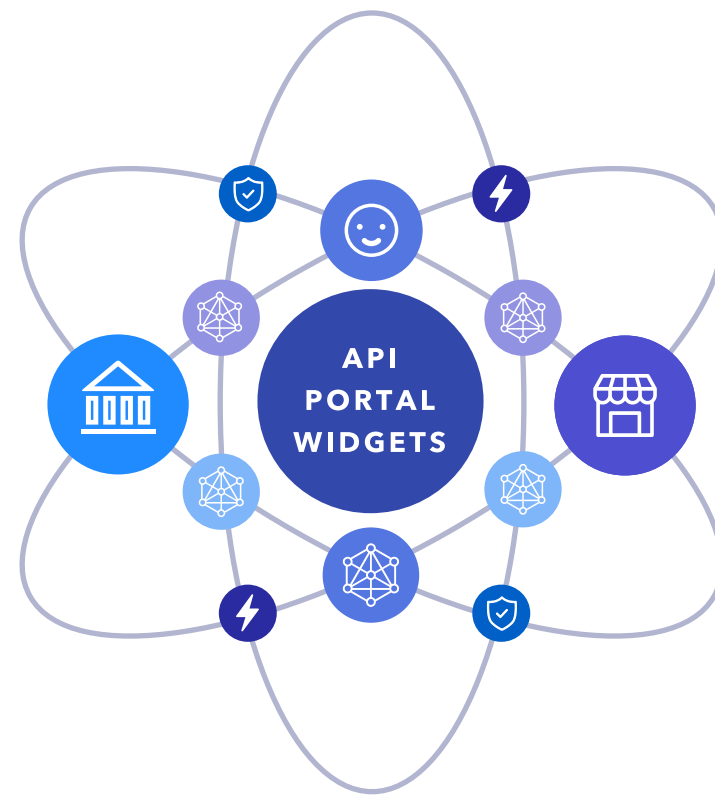

A decade of cutting-edge digital innovation has conditioned consumers to expect nearly-instantaneous, frictionless interaction when conducting business online. Unfortunately - when it comes to bill pay technology - too many financial institutions continue to cling to outdated, legacy tech that fails to meet consumer needs.

Simply upgrading or adding new, parallel bill payment capabilities to existing ones will fail to deliver the full potential of your digital infrastructure.

It's time to migrate legacy bill payment systems to a new platform that offers the speed, greater convenience and richer functionality that customers expect.

The **New** Way to Bill Pay™

From managing bills & subscriptions to making payments, the future of bill pay is here.

Speed, Choice, Intelligence

BillGO manages the largest and most robust eBill network in the industry, enabling your customers to quickly find billers, make real-time payments and get confirmations instantaneously. Designed around a modern user experience, they get one simple view to manage all their bills and set reminders and notifications.

A Smart Way to Generate ROI

Because bill pay is one of the “stickiest” services you can offer, BillGO helps you create a foundation to build meaningful, long-term customer relationships. Understanding bill pay patterns enables you to customize other products and services.

Quick & Simple Integration

Our secure, fully-compliant platform and state-of-the-art APIs and widgets make institutional integration a snap enabling interactions between enterprise software components, operating systems, and microservices. And the resulting data fuels actionable insights.

Discover the power of speed, choice and intelligence.

BillGO enables anyone to accept and make bill payments, This is why major financial institutions and fintechs are choosing BillGO.
