

BillGO Bill Pay

BillGO's bill pay solution enables you to provide your customers with a centralized bill pay experience where they can view, manage, and pay all of their bills with speed, choice and intelligence.

74% of consumers want a centralized bill pay solution

Easy Biller Set Up.

BillGO's biller set up offers a user-friendly experience where your customers can quickly link to most billers using just a user name and password. BillGO's powerful network connection does the heavy lifting making biller set up easy.

Manage & View Bills in a Central Location.

BillGO empowers your customers giving them complete control over how and when they pay their bills and subscriptions. Customers have choice with their payment method and date of one-time or recurring payments.

Notifications & Reminders.

Your customers can receive real-time notifications and reminders for linked billers in their bill pay account. This helps customers stay on top of all their financial obligations using a consolidated tool instead of manual tracking. Nine-out-of-ten consumers want payment options, notifications and reminders.

Pay In Real Time.

BillGO offers the ability to make real time payments 24/7/365 to a large number of billers, as well as enabling a pay anyone model that offers traditional electronic payment methods and checks. BillGO's innovative bill payment engine brings the speed, convenience, and confirmation of real-time payments to consumers and billers alike.

Instant Payment Confirmation.

BillGO takes the hassles out of making sure payments are received. Payment confirmation through a real time payment, gives customers real time confirmation directly from their linked billers showing bills are paid, putting their minds at ease.

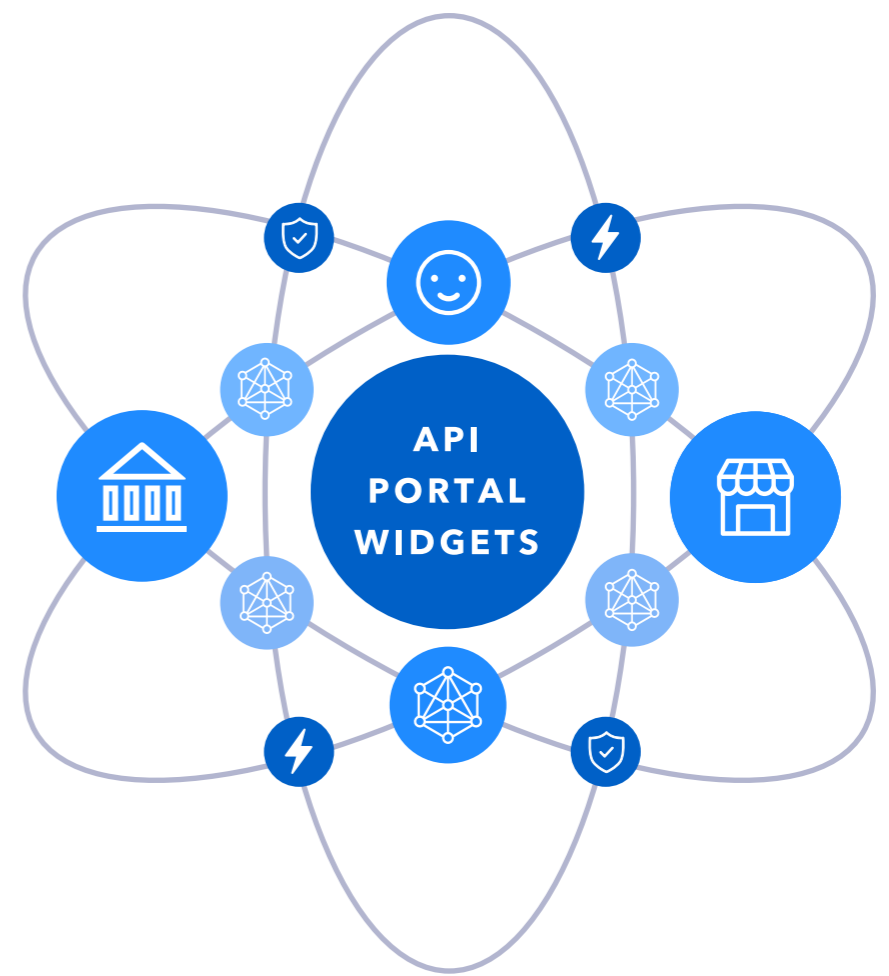

Secure Payments Using a Virtual Card.

Using virtual cards is simply a faster and more secure way to make payments. When a virtual card is used to make a payment, the customer's bank account information is not provided to the biller, which protects this sensitive information in the event of data breach for the biller's website. Nine-out-of-ten consumers want secure environments and transactions.

BillGO.

The **New** Way to Bill Pay™

From managing bills & subscriptions to making payments, the future of bill pay is here.

Speed, Choice, Intelligence

BillGO manages the largest and most robust eBill network in the industry, enabling your customer to quickly find billers, make real-time payments and get confirmations instantaneously. Designed around a modern user experience, they get one simple view to manage all their bills and set reminders and notifications.

A Smart Way to Generate ROI

Because bill pay is one of the “stickiest” services you can offer, BillGO helps you create a foundation to build meaningful, long-term customer relationships. Understanding bill pay patterns enables you to customize other products and services.

Quick & Simple Integration

Our secure, fully-compliant platform and state-of-the-art APIs and widgets make institutional integration a snap enabling interactions between enterprise software components, operating systems, and microservices. And the resulting data fuels actionable insights.

Discover the power of speed, choice and intelligence.
