Businesses like yours are facing seismic changes – a deeply uncertain economic environment, paired with shockingly rapid advancements in tech, means project managers must be ready for anything. That's where Tempo comes in.

Tempo's robust suite of tools is tailored for today's unique challenges, empowering you to deftly manage large portfolios within complex organizations. With Tempo, your team can:

- Effectively balance risk and reward amidst evolving market conditions
- Optimize resource allocation and streamline decision-making
- Foster collaboration across departments and teams
- Monitor and report on performance to ensure alignment with strategic goals

Unlock new levels of efficiency and agility in managing your strategic portfolios, paving the way for sustained growth in a rapidly changing world. **Build better, together, with Tempo.**

Roadmapping & idea management

roadmunk by Tempo

Align on product development strategy, organization-wide. Capture customer feedback, prioritize what to build next, and communicate clearly with boardroom-ready roadmaps.

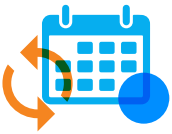

Build roadmaps in minutes

Easily communicate plans and facilitate faster decision-making. Visually appealing roadmaps keep everyone in sync, so product and project managers can move faster and focus on their core tasks.

Onboard team members easily

Roadmunk is an easy-to-deploy and easy-to-learn solution, so everyone who needs it can use it. Widespread adoption boosts coordination even further.

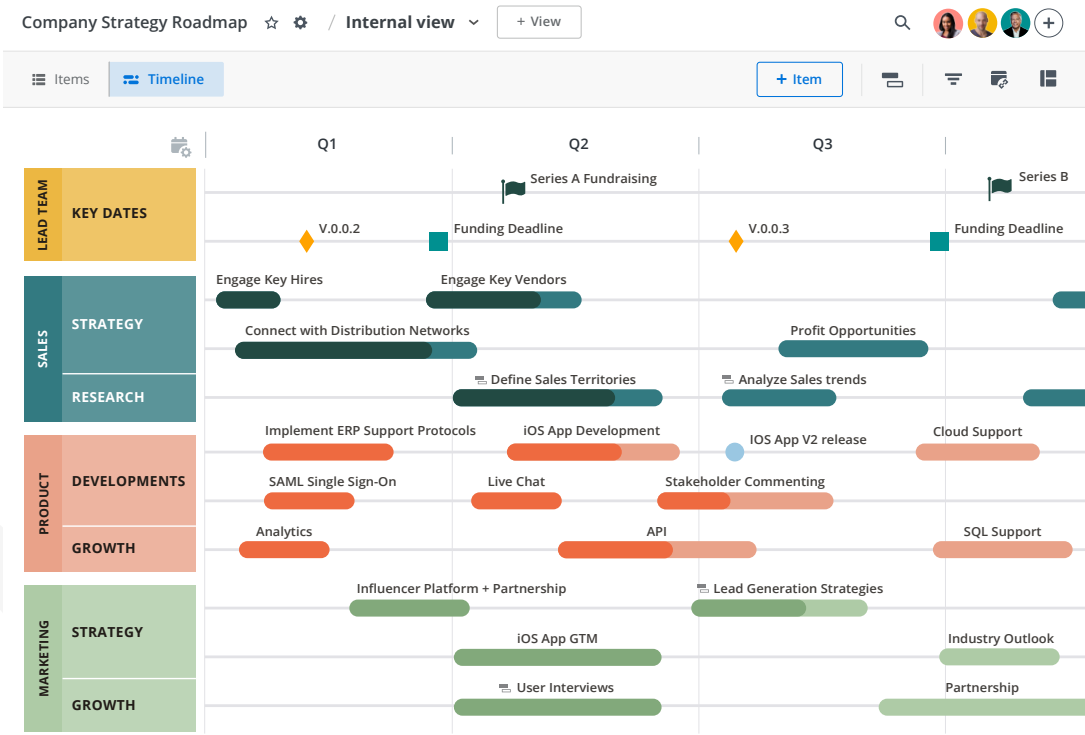

Save time with automation

No need for manual data entry, and no worries that the roadmap is out of date – Roadmunk can pull data directly from software like Atlassian Jira, Microsoft Azure DevOps, and more.

> My teams are working on hundreds of projects concurrently. We're responsible for supporting billions of dollars' worth of product revenue. I'd like to thank Roadmunk for enabling my team to do more of the work that matters.

Conner Duffy - Global Director DELL

Visualize your strategy on a roadmap and create alignment around initiatives, objectives and milestones.

Project & program management

STRUCTURE by Tempo

Manage work and report progress – across projects, teams, and initiatives – exactly how you want to. Agile, waterfall, or hybrid? Structure supports it all.

Empower teams to do their best work

Structure doesn't impose global hierarchy settings, so teams can manage thousands of issues however they like. Scale and adapt easily, without changing apps or processes.

Communicate real-time progress

Connect work from multiple Jira projects and teams in one view, allowing teams to communicate clearly and efficiently across all levels of work.

Reveal key insights to make smart decisions

Powerful aggregation, unique reporting features, and close integration with Timesheets enable teams to extract real-time insights from their Jira data, so they can detect risks early.

> Structure is an extremely powerful app. Creating hierarchies of tickets is straightforward. Complex cases can be handled by using simple scripting. In addition to amazing data visualization capabilities, issues can be created and edited directly. When using this app the only limit is your imagination.

Paweł Kupczak - Director of Software Development & Delivery

GANTT Structure extension by Tempo

Turn any Structure overview into a Gantt chart. Visualize Jira project plans, schedules, and dependencies so you can keep everyone in the loop.

Get all planning done – with one app

Configure Structure.Gantt to meet the trickiest requirements, so all teams – agile, waterfall or hybrid – can plan work exactly as they need to.

Gain real-time insights

See resources and project information in one view, so you can adapt quickly and resolve over-allocations, dependencies, and scheduling conflicts in a few clicks.

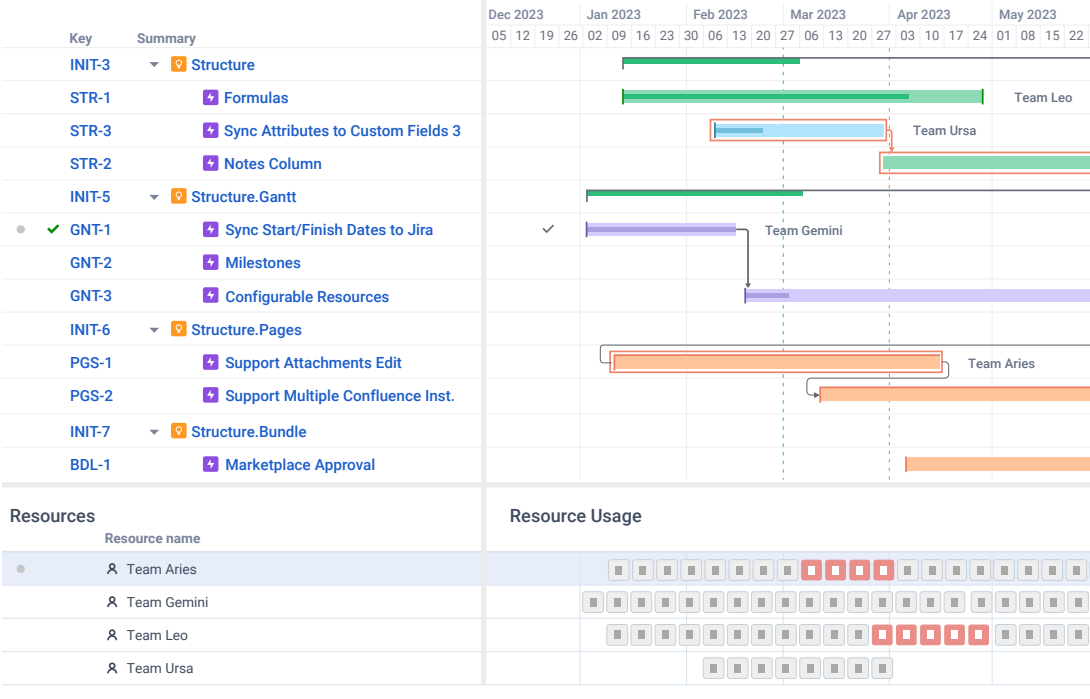

Keep everyone on the same page

Capture all levels of work to easily track and report on progress. Teams can zoom into details, while management gets a familiar Gantt overview.

> If you're a user of Structure for Jira, Structure.Gantt is the next step in providing a complete project management solution for hybrid methodologies inside Jira. We use it to extend the power of Structure to help users easily identify dependencies, visualize work, and plan well into the future.

Resource & cost management

Timesheets by Tempo

See where your organization's time goes, so you can deliver projects more efficiently. Enterprise-grade, automated time-tracking and powerful reporting have made Timesheets the most popular time-tracking and management solution for Jira.

Deliver the right things, faster

Simple, automated time-tracking enables meaningful and comprehensive insights into how your organization spends time. Make teams more efficient and focus work on higher-impact efforts.

Improve the bottom line with streamlined cost reporting

Get accurate billing and invoicing, track CapEx vs OpEx spending, and track budget and developer investments across product & project portfolios with our Jira Align integration.

Scale in size and complexity as needed

Access sophisticated project management solutions connected to Timesheets, so you can expand resource- and cost-management capabilities.

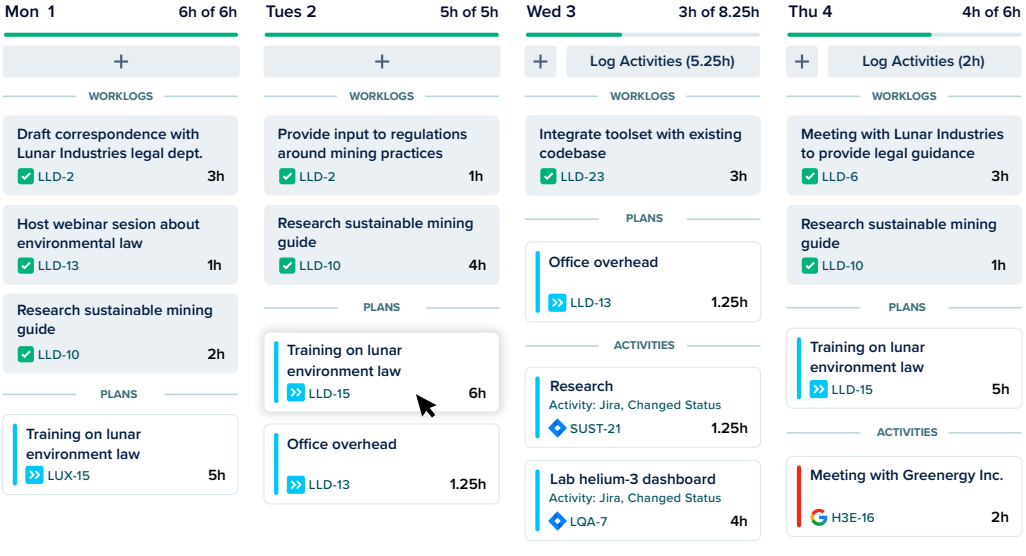

Jira Align

Accurately budget and track developer investments across product portfolios with **Tempo's integration for Jira Align.**

Learn more →

> With Timesheets, we can provide more reliable reports to our board of directors and PMs, and, of course, to our clients. We totally recommend it for any company that needs a reliable, flexible and complete solution to register, control and extract information on collaborators' worklogs.

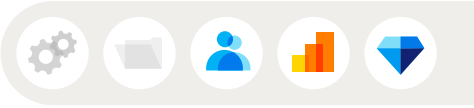

Rodrigo Meurer - COO FUERZA STUDIO

Log time across multiple projects so you can quickly find vital data about how your organization spends its time.

Resource & cost management

Planner by Tempo

Organize your team workloads while optimizing capacity with sophisticated planning and reporting.

Staff smarter

Assign the right team members to the right projects, while making sure workloads are balanced. Craft an environment where cross-collaborating employees can be more productive.

Ensure plans are achievable

Confidently determine whether your teams can handle project proposals, and in what time frame. Understand your team's capacity and skills so you can succeed at your initiatives.

Improve future forecasts

Seamless integration with Timesheets by Tempo lets you compare planned time to actual time spent on a project – capture valuable insights to refine and optimize plans.

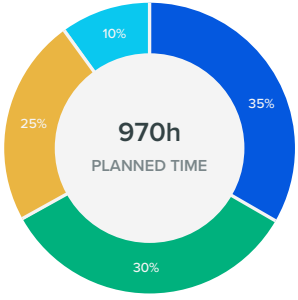

> I'm working as a resource manager and Tempo is my daily bread. I'm incredibly happy with it. We currently use it to allocate more than 200 people on roughly a hundred projects. I cannot imagine doing it without Planner by Tempo.

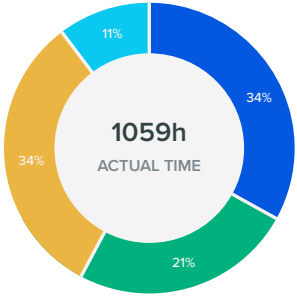

Katerina Rausche - Project Resource Manager pricefx

PLANNED TIME	ACTUAL TIME	TIME VARIANCE	PROJECT VARIANCE
970h	1059h	-9.2%	-13.0%

Resource & cost management

Cost Tracker by Tempo

Get real-time financial overviews of projects and portfolios, so you can spot problems early, monitor progress, and measure profitability.

Quickly grasp important metrics

Review portfolio-level financial health or drill down to individual projects with ease. Integration with Timesheets by Tempo paints a clear picture of project progress.

Control costs

Set budgets and budget milestones to ensure your projects are matching up with their related labor costs and expenses. Improve cost estimates through historical project data.

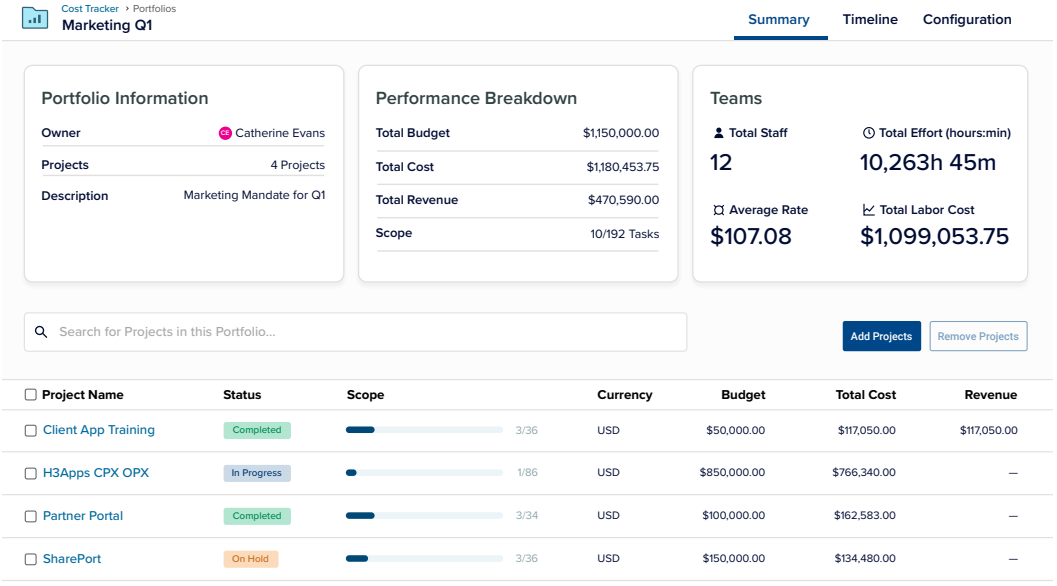

Make informed decisions

Stay up to date with an accurate reflection of the work being done and pivot if necessary. Make the right moves to succeed on your initiatives.

> Absolutely love Cost Tracker. Working in an agency environment, it was the final piece of the puzzle that allowed us to transition confidently to Atlassian without needing to maintain a portfolio of other loosely integrated tools.

Luke Bowler - Head of Client Services everything connected

Keep an eye on costs so you can make smarter, faster decisions to maintain projects' financial health.
