

Headline: Come Visit USP at Booth #1343!

Tagline: Listen in as our experts discuss Novel Excipients Development, General Chapter <1220>, The Analytical Procedure Lifecycle, and Asbestos Testing in Talc.

Check out our line-up of USP scientists offering presentations at 2022 AAPS PharmSci 360. You can view the details at the [\[add link-exhibitors listing\]](#) to learn more. Add them to your conference agenda!

Join USP Senior Director of General Chapters, Horacio Pappa, presents “**The Analytical Procedure Lifecycle. A compendial guidance for the implementation of an enhanced approach for method development and validation**” about USP’s proposed adoption of a lifecycle approach that can potentially be applied to all procedures. **Wednesday, October 19, 2022 9:30 AM – 10:00 AM ET**

Excipients Principal Scientist, Jenny Liu, will present her poster, **Compendial Strategy to Update Asbestos Testing Methods for Quality Control of USP Talc** outlining USP’s strategy for asbestos testing method development and the round-robin studies for X-ray Diffraction (XRD) and Polarized Light Microscopy (PLM) tests. **Wednesday, October 19, 2022, 3:30 PM – 3:45 PM ET**

You can hear Jenny again, when you stop by the USP Q&A Rapid Fire Talk, **Latest Advances in USP’s Compendial Efforts on Novel Excipients Development** to learn about USP’s collaboration with FDA and industry to develop a systematic approach to remove the current barriers to using novel excipients in new therapeutics/advanced formulations.
