Multi-Unit Franchising

Efficiently run all your franchise entities at once with integrated accounting solutions for reporting, people, payroll, and time.

Whether you own the most popular fast food restaurant in your region, a dozen fitness centers, or 100 tire shops in your state, we offer technology to streamline your financial reporting and planning. You'll also be able to recruit and retain the best employees to help your multi-unit franchise business thrive with human resources management tools that include reliable time tracking and payroll features.

Benefits of Intacct and Workforce Go! for Multi-Unit Franchise Operations

Financials Consolidation

Accurately track financials for multiple physical locations, including capital expenses and recurring yet fluctuating costs and income related to inventory, utilities, and payroll. Accounting software that rolls up financials each month saves time and effort and enables up-to-the-minute accuracy of key indicators such as profit and cash flow projections.

Real-time Reporting & Data Visibility

See how much money you are bringing in at each of your franchise locations—at this very moment—with a reporting system that provides real-time visibility. Choose the financial and operational metrics your company needs to make informed plans and continue to grow profits.

Payroll, People & Time Management

If you employ short-term and part-time workers, you may be drowning in job applications and timesheets to review, and paychecks to issue. We offer a simple way to track candidates, new hire paperwork, staffing coverage, compensation, and performance reviews. And your staff can take the reins with their own benefits management and time tracking portals, using any device.

Control labor costs with custom pay rules. Also, manage benefits, attendance, and payroll in real-time to keep financial accounting records up-to-date for ACA compliance reporting.

Any business with multiple locations or entities benefits from Intacct's cloud ERP software, which is built to consolidate financials. Using the simple interface, easily allocate expenses across all units to increase profits. You'll close out month-end books faster than ever, and access profits and cash flow info in real time.

In a customer-facing environment, to efficiently staff each location with the most capable individuals, you need tools to smartly manage recruitment, payroll and benefits. This can seem overwhelming with a multi-unit franchise, but Workforce Go! lets you view data for all your employees at once. Anytime, anywhere mobile capabilities mean you're no longer tied to a computer fixed in a back room.

Let's chat about the best options for your multi-unit franchise business.
