Her handbag was her trademark

She was rarely seen without it. In fact she once described her handbag as, "the only safe place in Downing Street." The Iron Lady from across the pond was powerful and passionate, just like the blazing hue of this exquisite satchel. She knew what a pound — or dollar — was worth. And so do we.

The Baroness became a fashion icon for women of power and anchored every outfit with a solid handbag. Even though her British bag of choice was economical when compared to French and Italian icons, the price tags on most of the purses she carried around Parliament started north of \$1,000. Yes, she preferred the starkness of basic black, but something tells us that the former Prime Minister would approve of the sturdiness, sophistication and savings that comes with our Baroness Burgundy Handbag.

This semi-hard case satchel steals the show in eye-popping, bold burgundy. The gleaming, patent leather look with a fabric interior includes interior pockets to protect personals. A magnetic clasp ensures the flap stays closed. Even if you're not helping to run the Free World, this is a great looking go-to bag. It goes from brunch to a night out, and back again, collecting compliments all the way.
