

***New!* Knock her over with a feather**

While investigating a cave near Verona, Italy, paleoanthropologists found the remains of over 600 birds and observed that many of their intricate feathers had been specifically removed. It was evident that only certain feathers were plucked: the longest and most beautiful. They theorized that early human ancestors - as far back as 44,000 years - adorned themselves with feathers as ornamentation and jewelry.

Fast-forward to today and recent trends show a feather fashion resurgence. But the uniqueness of feathers will never over-shadow the age-old beauty of the “queen of gems”: the pearl - and this unique jewelry combo has both! This spectacular Plumage Pendant with coordinating earrings is the epitome of trend-setting fashion. Set in stunning .925 sterling silver, each piece features an electroplated, shimmering color-enhanced feather and your choice of luminous white or black cultured pearl that sets the tone for elegance and artistry. And if that isn't enough of a jewelry explosion, a radiant stripe of lab-created DiamondAura rounds completes the exceptional design. Knock her over with a feather... and a pearl!
