

██████████, BS, CADC-I

Community Liaison

██████████ was born and raised in Asheville, North Carolina, with an incredibly supportive family who still resides locally. After years of struggles and unmanageability due to substance use, she found herself here at ██████████, as a patient herself, where she started her recovery journey.

She began her career helping those with substance use struggles as a peer support for five years, leading to obtaining a CADC-I and Bachelor of Science in Correctional Program Support Services from the University of Phoenix. After three years of peer counseling, she joined our ██████████ Treatment Center Team as a counselor.

██████████ has always been passionate about helping to connect those struggling with resources to obtain success. It was her passion that ultimately led to her obtaining her incredible role as our Community Liaison.

██████████, DO

Medical Director

Dr. ██████████ holds a BS in biopsychology with an emphasis in chemistry. He attended medical school at Kansas City University of Medicine and Biosciences. After medical school, he completed his general psychiatry residency at an internationally known psychiatric clinic.

██████████ later worked in a large hospital setting for five years as a psychiatric hospitalist taking care of geriatric patients, caring for patients with psychiatric issues on the medical floors and ICU (intensive care unit), detoxifying clients from alcohol and benzodiazepines, ECT treatment for depression, and served as Medical Director and Chief of Psychiatry.

He then moved to Western North Carolina in 2007 to become the Medical Director of the inpatient psychiatric unit and the detoxification unit at one of the area's top hospitals and served for seven years in that capacity. Most recently, ██████████ has been treating adolescents and adults in sober living environments, residential treatment centers, community behavioral health and outpatient settings.
