

WMS – PRODUCT PAGE

SECTION 1

Amplify Order Fulfillment and Scale Effortlessly with SBX WMS

Enabling growing enterprises to outpace the demands of tomorrow.

SECTION 2

Designed by Operators for Operators: A Brainchild of 35+ Years of Rigorous Testing by World-Class Experts.

Intelligent: Advanced ML & optimization algorithms for peak efficiency.

Unified: Comprehensive platform with in-built WCS, YMS, and analytics.

Engaging: Intuitive UIs designed for the new age workforce.

Extended: Manage break bulk/eaches with omnichannel capabilities.

Adaptive: 300+ configurable parameters for rapid customization.

Cloud Native: Lower TCO with no need for on-prem servers.

Achieve up to X% reduction in packout processes.

Experience an X% increase in daily order ship volume.

Realize a 10x increase in warehouse efficiency.

SECTION 3: IMPACT

Count on Us to Deliver Every. Single. Time.

- 50% Increase in Order Picking Speed
- 80% Reduction in Manual Errors
- 60% Improvement in Inventory Accuracy
- 40% Boost in Labor Productivity
- 70% Faster Order Processing Times
- 90% Uptime Guarantee with Cloud-Native Solution

SECTION 4

Orchestrate Warehouse Performance and Maximize Resource Productivity

Inbound

Seamlessly manage receiving operations with intelligent scheduling and real-time updates.

Putaway

Optimize storage locations with our advanced algorithms that maximize space utilization.

Internal Movement

Streamline stock management and inventory count with live tracking and dynamic task assignments.

SBL Picking

Leverage our game-changing SBL technology for unparalleled picking speed and precision.

Outbound

Ensure timely and accurate outbound logistics with advanced load planning and route optimization.

SECTION 5

Components of SBX WMS

Warehouse Execution System (WES)

Orchestrate warehouse operations with intelligent task management and real-time resource allocation.

Warehouse Control System (WCS)

Seamlessly control automation hardware like conveyors, PTL, and AS/RS for streamlined material handling.

Yard Management System (YMS)

Efficiently manage dock operations, vehicle movement and parking management for smoother inbound and outbound logistics.

Warehouse Design System (WDS)

Design optimal warehouse layouts and slotting strategies with advanced engineering tools.

Warehouse Performance Analytics (WPA)

Gain actionable insights into warehouse performance with real-time analytics and dashboards.

SECTION 6

Built for Scale

SBX WMS is designed to grow with your brand.

Our cloud-native architecture and microservices approach allow you to scale operations effortlessly.

SECTION 7

Leading the Industry with Intuitive UI Design

Unlike outdated interfaces from other providers, our easy-to-train UI sets a new standard in usability.

We empower modern-day users with modern design principles.

SECTION 8

Unlock Insightful Warehouse Performance

Our advanced analytics engine provides real-time visibility and data-driven insights across key warehouse processes.

Track performance metrics seamlessly with intuitive dashboards.
