- 10X Increase in Vehicle Utilization

SECTION 4

Accelerate Transport Logistics

Management

One single window for streamlining your logistics and managing entire delivery operations.

Planning and Execution

Plan smooth first-mid-last mile delivery and orchestrate fulfillment seamlessly.

Monitoring

Stay in complete control of your entire transportation network with fulfillment control tower.

SECTION 5

Components of TMS

Transport Optimizer

Optimizes routing and scheduling to ensure timely deliveries while minimizing operational expenses.

Load Optimizer

Maximizes vehicle utilization and reduces costs with advanced load planning and optimization.

Track & Trace

Provides real-time visibility into your shipments with notifications to track delivery progress.

Digital POD (Proof of Delivery)

Driver app ensures delivery confirmation with proof by photo, OTP, or signature.

Execution Control Tower

Manages entire delivery operations with live monitoring and swift exception resolution.
