

COMPANY Night 1G Pre-rolled Joint - Ghost Train Haze

Short (150) - Tightly packed with THC that slaps, COMPANY Night is a 1g pre-roll filled with Ghost Train Haze ideal for the experienced connoisseur

Long (1000) - Leave the week behind, it's finally Saturday. Our COMPANY Night 1g pre-rolls are packed with sativa-dominant hybrid Ghost Train Haze. Available in a 1g pre-rolled joint, COMPANY Night offers high THC potency potential ideal for the experienced connoisseur. These dense buds are deep green with a purple hue and have a pungent spicy aroma. The hazy scent comes from terpenes like terpinene and caryophyllene, creating a robust experience.

Grown in Ontario, our flower is harvested with care and hand-trimmed to preserve the plant's unique fragrance and delicate trichomes. COMPANY only happens once a week, let us do the work for you. Our COMPANY Night pre-rolls are a fully finished product; we have milled, rolled, packed and sealed the joint for you. COMPANY Night's Ghost Train Haze pre-rolls are ready for the weekend - are you?

COMPANY 1G 510 Cart - Lemon Haze

Short (150) - This sativa-dominant hybrid is inspired by OG cultivator Lemon Haze and packs a pungent citrus scent. Leave the week behind, it's finally COMPANY.

Long (1000) - COMPANY only happens once a week, celebrate in style with our new 510 cartridges Lemon Haze. This sativa-dominant hybrid is inspired by OG cultivator Lemon Haze, with a powerful and pungent citrus aroma. Its signature lemon scent comes from terpenes limonene, beta-caryophyllene, myrcene, humulene, and alpha-pinene. With the highest possible THC potency potential, COMPANY's 510 carts are here for the weekend.

COMPANY 510 cartridges are attractively priced without sacrificing potency or quality. We offer flavour-focused vape cartridges that have high THC potency potential ideal for the experienced connoisseur. Made with cannabis biomass and perfectly curated botanical terpene profiles, our distillates offer reliable outcomes without the work. Our conveniently sized 1g cartridges are packaged with sustainability in mind, offering 80% less plastic waste. Leave the week behind, it's finally Saturday.

COMPANY 1G 510 Cart - Sour Pineapple

Short (150) - This sweet and fruity hybrid is inspired by OG cultivator Pineapple. Our 1g cartridges are attractively priced without sacrificing potency or quality.

Long (1000) - COMPANY only happens once a week, celebrate in style with our new 510 cartridges of Sour Pineapple. This sativa-dominant hybrid is inspired by OG cultivator Pineapple, with a sweet and fruity aroma. Reminiscent of pineapple cream soda, COMPANY's Pineapple distillate is packed full of terpenes including limonene, linalool, alpha-pinene,

myrcene, and beta-caryophyllene. With the highest possible THC potency potential, COMPANY's 510 carts are here for the weekend.

Individual Cultivator Descriptions:

Pedro's Sweet Sativa:

Pedro's Sweet Sativa is a proudly Canadian sativa-dominant hybrid with fluffy, trichome-covered buds. Rich in terpenes like beta-caryophyllene and pinene, Pedro's Sweet Sativa smells sweet with undertones of spice. Unique to COMPANY, this high-THC cannabis is a genetic cross of Dominican sativa, White Russian, and an unknown Indica.

Blueberry Seagal:

Blueberry Seagal is an indica-dominant hybrid, hand-selected by COMPANY's brilliant phenotype hunters. This cultivator has light green buds with light orange hues throughout, giving off a sweet floral aroma. Blueberry Seagal hits the nose with crisp hints of berry and pepper from naturally occurring terpenes beta-caryophyllene and nerolidol.

Ghost Train Haze:

Not your typical sativa, COMPANY's Ghost Train Haze is a fan favorite with its thick, dense buds blanketed in crystal-capped trichomes. This cultivator gives off a sweet and piney scent, with notes of earth and pepper. Known to be a potent strain with a rich terpene profile, Ghost Train Haze is a genetic blend of Neville's Wreck and Ghost OG.

Mango Haze:

Mango Haze is a cultivator high in potency and rich in flavour. Bountiful terpenes give this cultivator its signature mango scent. The sativa-dominant hybrid produces dark green, resinous flowers with bright orange pistils. Mango Haze is a genetic cross between Northern Lights, Skunk, and Haze; with dominant terpenes of p-cymene, myrcene, pinene, and beta-caryophyllene.

Black Sugar Rose:

Black Sugar Rose is an indica-dominant hybrid with an aroma of musk and freshly cut flowers. COMPANY's Black Sugar Rose is a cross-cultivation of Critical Mass and Black Domina, giving it its unique properties and CBD content. The dark green buds are densely coated in amber trichomes accented with bright orange pistils. Dominant in beta-caryophyllene, myrcene, and limonene, this cannabis flower is earthy and floral with a hint of toasted sugar.

Pouch Packing Descriptions:

Black Sugar Rose is an indica-dominant hybrid with an aroma of musk and freshly cut flowers. COMPANY's Black Sugar Rose is a cross-cultivation of Critical Mass and Black Domina, giving it its unique properties and CBD content. The dark green buds are densely coated in amber trichomes accented with bright orange pistils. Dominant in beta-caryophyllene, myrcene, and limonene, this cannabis flower is earthy and floral with a hint of toasted sugar.

COMPANY Cannabis products are grown in Southern Ontario, using state-of-the-art greenhouses with strain-specific nutrient and water regimes to ensure the purity of each plant. Cannabis flower is harvested with care and dried naturally, for optimal flavour and freshness.

Our new nitrogen-infused packaging ensures the highest quality cannabis possible. Nitrogen is used to remove excess oxygen, preserving potency, fragrance, and overall quality - and with 80% less waste than conventional packaging!

510 Thread Descriptions

Our Mango Haze distillate is high in potency and rich in flavour. COMPANY's Mango Haze cartridges have a robust terpene profile creating its signature mango flavour. The sativa-dominant hybrid has dominant terpenes of p-cymene, myrcene, pinene, and beta-caryophyllene.

Our cartridges are free of heavy metals, made with a ceramic core, and fitted with a BPA-free mouthpiece. Certified child-resistant, our products can be used with any 510-compatible battery. Unlike disposable vape pens, batteries for 510 cartridges can be recharged, significantly reducing waste from one-time-use batteries.

COMPANY Cannabis distillate is made with critical CO2 extraction and packaged in the industry standard 510 thread cartridges. COMPANY Cannabis provides strain-specific distillate made from the best-in-class cannabis biomass. Our distillates contain no artificial additives, only top-tier cannabis distillate and plant-based terpenes.

PRJ Descriptions

The same high-quality cannabis you've come to expect from COMPANY - now available in a pre-rolled joint! High in THC, Ghost Train Haze makes a robust distillate with a sweet and piney

aroma, with notes of earth and pepper. Not your typical sativa, COMPANY's Ghost Train Haze has thick, dense buds blanketed in crystal-capped trichomes.

Our pre-rolls are perfectly packed with milled flower, not trim, to ensure each joint contains the freshest and most flavourful cannabis possible. COMPANY Cannabis pre-rolls use flower that has been harvested with care, dried naturally, gently milled and then rolled into the perfect size. Each unit comes with two single session size joints, weighing 0.35g each.

COMPANY Cannabis products are grown in Southern Ontario, using state-of-the-art greenhouses with strain-specific nutrient and water regimes to ensure the purity of each plant. Cannabis flower is harvested with care and dried naturally, for optimal flavour and freshness.
