NuWave BruHub – A Smarter Way To Brew

The Smart Coffee Hub For The Modern Home

Overview:

- PERFECTING THE BREWING PROCESS | Coffee Has Never Tasted This Good
 - The BruHub utilizes a unique flavor infusion to wet your coffee grounds, where a small amount of water is used to prep the coffee for brewing, just like decanting a bottle of wine. Plus, the unique showerhead offers a consistent and steady water flow to get the most out of your coffee grounds. When these combine with the perfect brewing temperature and innovative features, you'll wonder how you ever drank coffee without a NuWave BruHub.
- EASY & CONVENIENT | Anyone Can Make The Perfect Brew
 - The BruHub's intuitive interface makes it incredibly easy to select size or customize your brew with just a few button presses. With the BruHub's speed and available options, you can get coffee shop taste without the coffee shop wait. And with plenty of brewing options at your disposal, it's never been easier to make your own cappuccino, mocha, cafe latte, iced coffee, and so much more. It's like having a barista right in your own kitchen.
- UNBEATABLE VERSATILITY | 3-In-1 Brewing Capabilities
 - The BruHub replaces your old drip coffee maker, single-serve machine, hot water kettle and more, saving space in your kitchen. The Single Serve Insert lets you make an 8 or 12-ounce cup of coffee using your favorite coffee pods. The Custom Brew Insert lets you brew a full or half carafe of your own coffee grounds. The Hot Water Insert lets you make instant hot water for tea, hot cocoa, Ramen and more, all while bypassing the coffee chamber to ensure no unwanted coffee taste.

Features:

- COFFEE YOUR WAY | Customize Your Coffee With The Press Of A Button
 - o 3-In-1 Brewing Options
 - Single Serve Insert
 - Quality and convenience at your fingertips. The NuWave BruHub
 accommodates virtually all of your favorite single serve pods, but with
 more flavor. Make an 8 or 12-ounce cup of coffee with a NuWave's preinfusion brewing feature that sends a controlled stream of water into
 the pod at the perfect brewing temperature to get the maximum flavor
 out before filling the remainder of your whole cup with the delicious
 coffee.
 - Custom Brew Insert

Just select the size, brew options and enjoy a delicious full or half carafe
of your favorite coffee grounds. Consistent, perfect water temperature
every time you brew. This Insert is made with a unique showerhead
which evenly distributes water into the chamber, extracting flavor from
all of the grounds, not just the ones in the center like you'd find in other
coffee makers.

Hot Water Insert

Make instant hot water anytime you want. This insert bypasses the
coffee chamber, so there is no coffee residue. Now make tea, cocoa,
and cider, hot meals like Ramen, instant rice, and soups. Unlike other
coffee makers which spit out dirty, yellow water, the BruHub's hot
water is just as clean coming out as it was going in, ensuring no
unwanted coffee taste or smell.

Customize Your Coffee

- Regular Setting
 - Use this setting to brew a traditional cup or carafe of coffee.
- Bold Setting
 - Use this setting for a longer brewing process to extract more flavor out of your coffee grounds, resulting in a richer, stronger brew.
- Iced Setting
 - Use this setting to extract even more flavor out of your coffee grounds by controlling the amount of water and length of the brewing process, resulting in a doubly strong brew that won't get watered down when poured over ice. This setting is also perfect for making your own specialty coffees like espressos and café lattes.
- ADVANCED COFFEE TECHNOLOGY | Get Coffeeshop Quality In The Comfort Of Your Own Home
 - The NuWave BruHub utilizes an advanced technique known as flavor-infusion. This involves wetting the coffee grounds with a small amount of water before the brewing process starts in full. Like decanting a bottle of wine, this facilitates something known as coffee bloom which is when the grounds release trapped carbon dioxide from the grounds, resulting in a fresher, more flavorful brew that meets the standards of even the most discerning coffee palates.
 - The NuWave BruHub includes one of the largest charcoal water filters on the market. By inserting this filter with the specially designed holder into the water tank, you'll ensure your coffee is free from unwanted chemicals, and any unpleasant odors or tastes. And if that wasn't enough, the BruHub positions the filter right at the bottom of the water reservoir and pumps all of the water through the filter, ensuring all of the water is filtered before it reaches your coffee grounds.
 - O The BruHub's advanced technology is made apparent as soon as it's turned on. Once you press the Power button, the BruHub automatically preheats the water in the reservoir to 130°F, allowing the water to reach 200°F faster once you press the Brew button, then returns to 130°F once the unit is done brewing. For added safety, the BruHub includes a 2-hour auto shutoff so any extra water can cool to room temperature if the BruHub is left unattended after 2 hours. Plus, if you accidentally let your coffee

mug overflow while brewing, you can simply press the Power button or Brew button to immediately stop brewing.

Benefits:

- PURE, CLEAN TASTE | Enjoy A Better Brew With Industry-Leading Innovation
 - Most coffee makers use metal heating chambers to heat up the water. The innovative BruHub uses a glass water heating chamber to ensure a perfect flavor without any unpleasant metallic taste you get from other coffee makers. Plus, the BruHub utilizes a patented charcoal filter, which is included with every BruHub, to filter out any unwanted purities, resulting in pure, clean coffee every time.
- PERFECT BREWING TEMPERATURE | Maximize The Taste
 - The BruHub's innovative thermal glass heater ensures an optimal temperature range of 195-200°F for the perfect cup of coffee. This hot water is introduced to the coffee grounds through a unique showerhead that ensures even water distribution throughout the chamber. This perfectly hot coffee is then funneled straight from the coffee chamber without any cold air exposure down a specially designed tube in the middle of the carafe, ensuring even and consistent heat distribution during the brewing process. This means that the coffee stays within 5 degrees of the original brewing temperature by the time it reaches the bottom of the carafe. Finally, the double-walled vacuum insulated carafe keeps your coffee at the perfect temperature for longer. And unlike other coffee makers, the BruHub doesn't use a hot plate to keep your coffee hot, ensuring your coffee won't burn while it sits in the carafe.
- EASY TO CLEAN | Spend Less Time Cleaning & More Time Enjoying Your Coffee
 - The NuWave BruHub includes many removable parts that aren't removable in other coffee makers. This means that unlike some other machines, the BruHub is much easier to clean, making it easier to prevent mold buildup you oftentimes find in other home coffee makers. Plus, each one of the BruHub's removable parts is dishwasher-safe, making cleanup even easier. As an added bonus, the adjustable mug tray lets you set your coffee mug in just the right place to minimize any drips or splashes, keeping your countertops clean when you make your morning cup of coffee.
