

## Overpass or Overplayed?

Overpass are an emerging young band from the Midlands. They've stormed the indie music scene, starring in support slots for huge bands such as The Wombats, and the Fratellis, and they aren't stopping there.

The buoyant band had a bustling summer of 2022, as they spent it dominating festivals such as: Truck festival, Y not! Festival and the Isle and Wight festival.

Earlier this year, they delivered a new song called 'On Your Own'. Whilst the song may not be what you'll have on repeat for the next two weeks, you will find yourself carelessly tapping your foot like it's a reflex.

Throughout their discography, you'll find that their songs have similar vibes, however each song possesses a different meaning and will take you on a rollercoaster of emotions. The band's brummie roots are clear throughout their vocals which compliments their indie-rock style.

As they release more songs, it's becoming increasingly evident that the band have been influenced by the indie-rock scene in Manchester in the 90s, which is also mirrored through their unique retro-style singles covers.

Since their creation in 2020, the band have made a first-rate start and it's exciting to see where they'll progress from here, as it's clear that they have every intention of being on the front page of every magazine.
