

Visionary Features For Ophthalmology Providers

See your practice in a new light with an EHR designed to simplify & automate ophthalmology workflows.

The Eye-Opening Solution Ophthalmologists Have Been Waiting For

Built-in ASC Solution

Follow the patient flow through the preop, anesthesia, intra-op, and post-op surgery phases.

Surgical Preference Cards

Automated surgical preference cards ensure providers have the right instruments and supplies prepared for each surgery.

Form-Based Documentation

Completely customize your documentation forms for eye exams, HPI, and chief complaints.

Refraction Flowsheet

View all refraction records instantly and print prescriptions with a click.

Diagnostic Image Modeling

Gain deeper insights with image type auto-detection for quick comparison and interpretation.

Janak Pandya,
Director Of Operations
Physician Directed Partners

"To stay competitive, practice owners and administrators need the ability to identify productivity bottlenecks. OphthalmologyEHR's easy-to-use reporting and analytics modules focus my attention on the issues that matter most and help keep my practice successful."

Shreena Patel,
Patient Support and Coordinator Manager
Milan Eye Center

"OphthalmologyEHR has maximized our appointment booking with its intuitive design that allows us to schedule multiple appointments per day and organize appointment bookings by provider."

Janna Anderson,
Director of Patient Support and Coordination
Milan Eye Center

"Not only does the software help us acquire patients, but it also takes the headache out of retention strategies."

Streamline Procedures and Improve Quality of Care

Chart View Module

Easily access all historical patient records without switching screens for maximum visit efficiency.

Take Your EHR Mobile

View lab results, manage prescriptions, and check scheduled appointments on the go with our IMSGo app.

Charting Dashboard

Chart visits with a customizable dashboard-style layout that adapts to your process.

Intelligent Assessment-Based Planning

Fix your visit note flow with smart tools to automate treatment plans based on your diagnosis.

Integrated Anesthesia Tools for Painless Surgery Workflows

Unlike competing solutions, our platform fully supports the planning, performing, and documenting of anesthesiology procedures without having to switch between systems.

Surgery Templates

Create preference cards based on anesthesia type.

Electronic Consent

Track and sign surgical consent forms electronically.

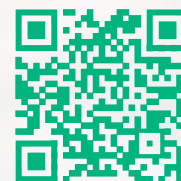

Vital Sign Monitoring

Document intra-op vitals faster by plotting readings on a graphical chart.
