Officials Launch the MemorialCare Technology and Training Center Powered by Sirius

Grand opening ceremony held at state-of-the-art technology center for healthcare IT experimentation, meeting and training

Fountain Valley, CA – 28 November, 2017 – Sirius Computer Solutions, Inc. ([Sirius](http://www.siriuscom.com)) and [MemorialCare](http://www.memorialcare.org) launched the *MemorialCare Technology and Training Center Powered by Sirius (MTC)* today with a ribbon-cutting ceremony attended by senior executives from both organizations and local dignitaries. Located in Orange County, California, near MemorialCare Orange Coast Medical Center, the MTC is a state-of-the-art technology facility for healthcare IT innovation, experimentation, meeting and training that was built with the ultimate goal of improving patient care and medical organizations' efficiencies.

"This is an exciting day for Sirius and MemorialCare," said Imran Salim, Senior Vice President of Healthcare Solutions at Sirius. "Healthcare IT innovators now have a secure, contained application environment to test, validate and pilot clinical technologies and ultimately discover new ways to serve their patients."

"Every patient encounter relies on robust information systems and thoroughly tested innovations," said Kevin Torres, Vice President of Information Systems at MemorialCare. "The MemorialCare Technology and Training Center powered by Sirius is a non-production environment where we can rigorously and rapidly test the very latest information systems upgrades and medical technologies."

The MTC's electronic health record (EHR) installation has a complete stack of technology capable of running a 2,000-bed hospital. The facility includes a standalone, isolated data center and simulation lab as well as meeting and training space. It includes a comprehensive collection of the latest technologies (including servers, storage, network, software and tools) to explore various aspects and requirements for a wide range of healthcare/EHR operational needs. Contact Sirius to learn more and discuss usage options and scheduling at 888-404-5468.

About Sirius Computer Solutions, Inc.: Sirius is a national integrator of technology-based business solutions that span the data center and lines of business. Built on products and services from the world's top technology companies, Sirius solutions are installed, configured and supported by our dedicated teams of highly certified experts. Sirius is focused on helping organizations of all sizes reduce cost and complexity, improve service levels, and minimize risk through the implementation of strategic solutions that include cloud, analytics, mobility, security, IT infrastructure optimization and more.
