

Safe Travels

OUR #1 PRIORITY—ALWAYS

Safe travels

by

The safety of our travelers has always been our top priority. In fact, our frustrations about partially shockingly poor safety standards at Mount Kilimanjaro, resulting in unnecessarily life-threatening and, in extreme cases, lethal situations for the lives of travelers and locals alike, is part of our founding story and why we exist—to make a difference for your safety!

As Travelife Partner, safe operating procedures are part of our responsible sourcing and operating criteria for our destinations all around the world, and we ensure those together with our local partners.

During your trip with Fair Voyage, all travelers have access to a local emergency contact number for 24/7 trip assistance. It is also essential that you and anyone included in your booking are covered by travel insurance. For questions specific to your destination and trip, ask your advisor or email support@fairvoyage.com.

+ 24/7 Trip Assistance

+ Safe Payment Solution

Specifically for Kilimanjaro climbs, which continues to be one of our most popular travel experiences, safety is of utmost and, at times, life-saving importance. In addition to highest safety standards for our climbs, we have also contributed significantly to raising awareness for travelers and the entire Kilimanjaro industry through a wealth of content creation, such as our articles on altitude sickness and other safety-related topics, our interview with the founder of Kilimanjaro Search & Rescue, or our founder's book *Kilimanjaro Uncovered*.

During the pandemic, all our team members took the World Travel & Tourism Council (WTTTC) Safe Travels training, and many our partners around the world took a leading role in developing safe COVID-19 operating standards and protocols for the entire local tourism industry in our destinations.
