Educating and Empowering our Youth

Our Youth are the future of Nigeria, they are resilient, resourceful and capable of great things, but the current administration has let them down, it called them lazy and unambitious, while leaving them without jobs or opportunities.

As president I promise to change the educational system, so that our youth can learn to not only read and write, but also think creatively and critically without fear. They need jobs when they graduate, but most importantly they need confidence that they can make a difference and have a say in the direction our country is taking.

AFTER 2 YEARS OF JOB HUNTING, DOZIE FINALLY LANDED AN INTERVIEW

Educating and Empowering our Youth

Our infrastructure is weak; past leaders did not invest in building roads, and improving electricity. Because of this, we need about N15 trillion to make things right. As president, I promise to use 12% of Nigeria's income, to build roads, institutions, and fix our electricity, because, I understand that sound infrastructure and power, are essential for growing our country and its people
