## **GROUNDBREAKING CEREMONY TO LAUNCH EVERGREEN ECO-VILLAGE**

A bold new vision for sustainable living

SAN DIEGO, California (Sept. 11, 2024) – Local officials, environmental leaders and community members will gather next week for the groundbreaking ceremony of the Evergreen Eco-Village, a revolutionary housing development designed to promote sustainable living. The event will take place on September 20, 2025 at the future site of the Evergreen development, located at 1234 Street Parkway, San Diego, CA. The \$100 million project is set to transform 200 acres of undeveloped land into an eco-friendly community that will house more than 500 families.

The event will mark the start of construction on a project that aims to integrate cutting-edge green technology with community-centered living. Evergreen is expected to be completed by 2026 and it aims to offer a bold vision for the future of sustainable urban design.

“Now is the time for us to show the world that we can be true community leaders and set an example for the future of urban development,” said Tim Cameron, CEO of Evergreen.

Evergreen Developments is a leader in sustainable housing, committed to creating eco-friendly communities that prioritize environmental responsibility and innovative design. By combining modern technology with a strong focus on community, Evergreen Developments builds homes that offer a greener, more sustainable future.
