

Subject: [GREAT NEWS] The Invest For Everyone Course is OUT!

Body:

Hello special one,

Hope you are having a great day, here's to wishing you all the beautiful things you love

I come with good tidings and a great news of course

Drum rolls

The Invest For Everyone course is officially out

The presale and early birds have been around for a week or two but now..

Wooh! It's time to get the real deal started!

I've been carefully selecting contents, recording videos, gathering and perfecting materials for the Invest For Everyone course for months now and I'm excited to let you in on all of it

I made this course for you if you have always been excited about the future and you are ready to start preparing or already started preparing for it

It sufficiently entails every right and proven strategies to invest and grow your portfolio to a million dollar and more, of course with time and patience

[Get the course now!](#)

This course contains 8 - 10 hours video walkthrough on:

- Introduction to investing
- Investor mindset
- Stock Investing [A-Z]
- Cryptocurrencies [A-Z]
- Charting basics
- Angel Investing
- Precious metals
- Tools and cheat sheet

Each of it are carefully explained in words you would easily relate to without consulting Siri

These are not just what I've learnt but also what I've implemented over the years

In the course, I shared my knowledge on investment with you and for sure, I didn't hold anything back

I put together everything I've learnt and practiced about the right mindset and knowledge of investment through the years especially for millennials like me

You also get *Bonuses Like:*

- ***Lifetime access to my community***

- ***Step by step walkthroughs on mobile devices and desktops for accessibility***
- ***DeFi Cheatsheet***
- ***Crypto Cheatsheet***

The course is out for just \$297 (at least for now)

Join in now

P.S: Do millennials have their own currency, yeah they do.

I will be talking about that in my next email. See ya!

Subject: Best time for YOU to embrace the Millennials currency ?

Body:

What else would have been better?

Looking into the future, getting jacked up and preparing for it or...

... just waking up on a sunny morning to a new world system wondering how time sneaked up on you?

Just like paper tenders were planned during the time of gold, silver and steel coins...

...the future of finance is being decided through **DeFi**

In fact, I call DeFi the Millennial's currency

Now, I know you've heard about it for 10s in 100 times in the last few months already

...but do you want to have a sneak peak into it in the most simplified way?

Get in for a minute or two..

So...

DeFi has being around as far back as 2009 when bitcoin was launched but it gained more acceptance in the finance industry when ETH was introduced

...and even though it has no particular founder, we can class Vitalik Buretin, the founder of ETH as an early fan and loyalist of DeFi

Now, What makes it different, could it be just hype?

DeFi is an open finance which simply means that a transaction happens between only the sender and the receiver with absolutely no third party intervention

You can't use your debit card without your bank's permission which in simple term means, you are not in full control of your own money..yeah, but DeFi gives you full control

Moving forward...

The foundation of DeFi is ETH Smart contract and every transaction is made through ETH SC

The SC technology makes scheduled or conditioned transaction possible, For example, You can make an order for ETH worth \$2000 to be sent to your VA on the 30th of July 'IF' ETH price breaks \$3k

Sounds advanced innit?

There is more...

Decentralized Finance (DeFi) is creating a world where every transaction could be automated and of course where you are in control of your assets

...and the most exciting fact about this is that, DeFi is still at the early stage, more operations will be introduced

The first handout you get when you cop the [Invest For Everyone](#) course are the

- **DeFi Cheat Sheet and**
- **Crypto Cheat Sheet**

...where I hid some cheats that will get you ahead and get you making money **right away** - *If you want to-*

[Get the Invest for Everyone course now!](#)

Not just that, When you sign up for the course, You get an 8-10 hours video walkthrough on

- Introduction to investing
- Investor mindset
- Stock Investing [A-Z]

- Cryptocurrencies [A-Z]
- Charting basics
- Angel Investing
- Precious metals
- Tools and cheat sheet

And Lifetime access to my community

You get access to all of these for just \$297 (for now)

Slots are limited and this sure won't be on for long as this is ONLY for a few like-minded people that being a millionaire and growing generational wealth matters to

If you are in that clique, Get on the this and ride with me to the top

>>>> *Join me now* <<<<

P.S : Oh, I plan to drop by a few DeFi applications especially one that I could bet you would want to know more about. What's that?

.
.

Alright, It's yield farming, What do you need to know about it? Is it a piece of cake or a sip of that drink you hate? I'll be back

Your partner in success
S.Beez

Subject: YOU will make money with this **RIGHT NOW!**

{firstname}

Which would interest you more?

I would love to know.

Technology is moving to cut out everything traditional in the Finance industry and It's just so exciting to watch

No better way (at least for now) than decentralized finance (DeFi)

So...

I was riding through the DeFi-hood in my last email and I promised to talk more about yield farming but first, let's see some DeFi applications

- Yield farming
- Liquidity mining
- Decentralized Exchange (DEXs)
- Stable Coins (USDT,USDC,TUSD)

- Lending Platform : where you can borrow money without putting down your name and submitting pictures of your birth marks (:
- Wrapped BTC

For now, I'll just briefly talk about yield farming,

OK..

Yield farming is simply putting your money to work by carefully searching through pools that offers the best APY (annual percentage yield)

As easy as it sounds or seems to make money from yield farming..

It is way easier to lose all your money if you don't get the right knowledge and follow the right procedures

The DeFi cheat sheet is filled with carefully picked out hacks on DeFi applications and many other hacks you need to get hold of and understand making money with DeFi

In fact, people that signed up of for the preorder and early birds are getting milks of just the cheatsheet already

Check out some of the reviews:

Subject: How to get your hands on REITs and Angel Investing

Hello {firstname},

How are you doing today? I hope you are doing great 'cos the universe is ready to work in your favor

...and I just wanna remind you that whatever it is you crave and dream of is very close by,

So...

Be calm and keep pushing on!

So today, I'm going to be sharing a few facts about REITs. You've heard of them, right?

Or do you think that it's just one of these high level finance lingo

Well...

Whichever pool you fall into, this email might interest you but first, would you get yourself dried up ? (;

Yeah, REITs simply means Real Estate Investment Trusts

It's no news that the real estate industry is one of the most lucrative and profitable industry to be in, either as a full time professional or investor

As long as human needs shelter, the industry will continue to matter and add tons of dollar yearly

REITs give you the opportunity to make money in the industry without having to look for the perfect individual properties to flip, rent or get into the deep maths and operating strategies of the industry

REITs are just companies that possess a portfolio of real estate properties

...and how they operate is that, they pool money from investors and help them own a piece of properties that the company owns

...it is similar to stocks, yeah

But the most exciting thing about the industry is its transparency

According to rule enforced by the IRS (Internal Revenue Services), REITs are to pay a minimum of 90% of their income to investors, the tax exemption privilege given to the industry makes this easier for them to achieve.

REITs companies are regularly monitored by auditors and analysts so this helps provide a level of transparency that is hard to find in other sectors.

As juicy as the industry is...

It is subjected to change and sleeping on it without having the right knowledge of how it works may result to bad losses because of market fluctuation

In the [Invest For everyone](#), I talked extensively about how to invest in REITs, Angel investing and alternative investments

If investing and taking charge of your future is really a thing for you as a millennial or Gen X and other generations, this course was made with you in my mind

It means we share the same interest and my guidance coupled with advices as a person that have been there and learnt quite a lot about general investments would take you years further
