

They say good things come in threes—and we agree!

When you sign up for Advanced Time Segmentation (ATS), you have the opportunity to achieve **3-digit business growth** in the first year with a proprietary income strategy solution available only to Cetera advisors.

Simply said, ATS helps you solve the retirement income challenge.

Using a time-segmented approach, ATS matches a client's assets with their income needs—helping you create customized retirement income plans built to withstand market volatility. This achieves three primary goals for your clients:

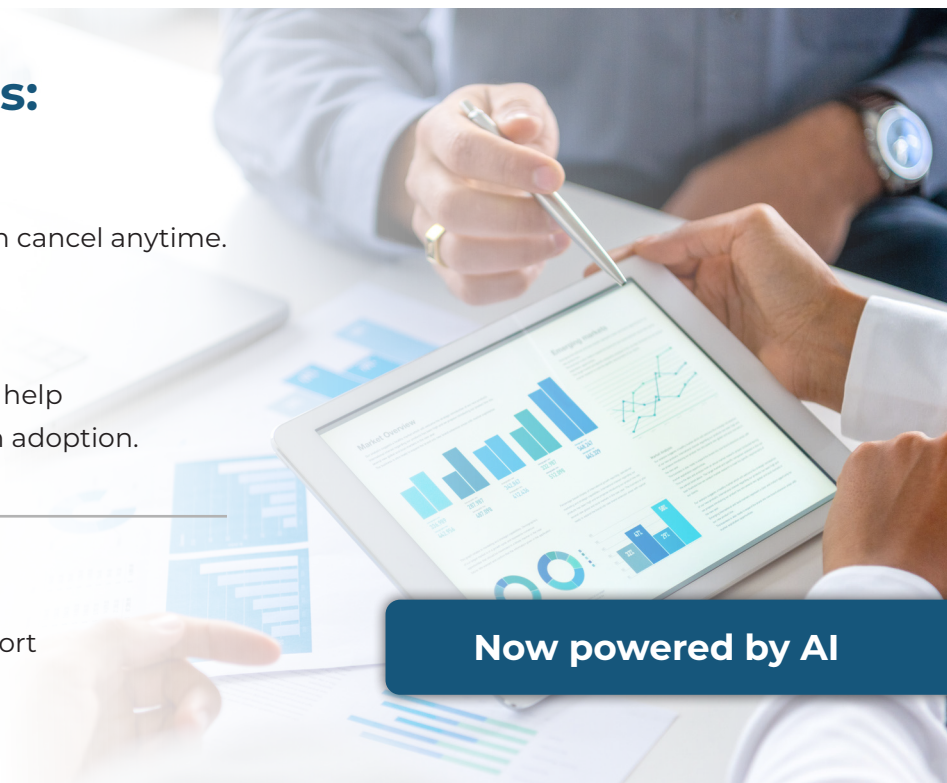

1. Creating income
2. Mitigating risk
3. Adjusting for inflation

What's in it for you? Advisors that use ATS often experience:

1. An increase in client referrals
2. Expanded client wallet share
3. A significant increase in AUM over non-ATS advisors.

The Formula for Success:

- 1 3-Month Free Trial**
There's no commitment and you can cancel anytime.
- 2 3 Plans in 3 Months**
Completing 3 plans in 3 months will help accelerate your success and solution adoption.
- 3 3-Digit Business Growth**
Advisors that follow this formula report significant gains in their first year.
