Company Announcement

RxCash+ Could Make Real Money for Your Pharmacy

One pharmacy that enrolled in RxCash+ just provided a pay increase to its staff with the extra revenue it generated. If you're curious about what this pricing program could do for you, join us Thursday! The pharmacist coach who supported them will discuss details of the program and take questions.

Webinar: Introducing RedSail RxCash+
Thursday, August 22, 1:30 PM (ET)

Pharmacist Spotlight

Laura Schwartzwald - GuidePoint Pharmacy

Laura, a North Dakota State University School of Pharmacy graduate, has worked in pharmacies around the Midwest since she graduated in 1988. As a pharmacist, Laura always desired to do more than just fill prescriptions. She thrives on helping people, getting to know her patients and how she can help them live a healthier life.

Product News & Features

Community Pharmacy Management Software

Add Patient Category List to Patient Master List Report

We have added the *PatientCategoryList* field to the **Patient Master List** report template.

Viewing the Category Inclusions can provide insight into the shared category groupings for patients included in patient search.

Add Latest Primary Claim Status to Rx Advanced Search Grid

The *Latest Primary Claim Status* column is now available on the **Rx Transaction Search Expanded**, **Expanded with Comments**, and **Expanded with Financial** search views.

The addition of this column will allow users to filter and identify the reversed or rejected claims that need review within the search results.

Add New Permissions for Export Data

The *Export Reports from Print Preview*, *Export Grid View*, *Print Grid View*, and *Print Reports* from Print Preview permissions are now available.

This will allow pharmacies to restrict permissions that allow data to be exported from the system based on role.

Subscribe your staff to the **NextWave Newsletter** today!
