

NEXT WAVE PHARMACY NEWSLETTER

November 20, 2024

Company Announcement

Happy Thanksgiving from RedSail Technologies!

We at RedSail Technologies want to express our sincere gratitude to our RedSail family. Your dedication keeps the pharmacy world turning. There will be no NextWave Pharmacy Newsletter during Thanksgiving week. Our next edition will be published on Wednesday, December 4. Until then, we wish you a happy, healthy, and safe Thanksgiving!

Product News & Features

Community Pharmacy Management Software

Add Dispensed Item Name and Prescriber Full Name to Patient Care Action By Patient with Lab Dates

The *CareGoalPrescribers*, *PrimaryRxNumber*, *PrimaryRxLatestRefillNumber*, *PrimaryRxPrescriberFullNameLastThenFirst*, and *PrimaryRxLatestDispensedItem* data fields are now available on the **Patient Care Action by patient with Lab Dates** report template.

Adding additional prescription and prescriber details to the Care Action report provides additional context to each Care Goal that will help the pharmacy resolve or assign the Care Goal to the appropriate team member.

Add ChangedBy Field to Inventory Returns and Adjustment Details Report Template

The *ChangedBy* data field is now available on the **Inventory Returns and Adjustments Details** report template.

This will allow pharmacies to use a report they are already generating to review who has made inventory adjustments without manually reviewing each item profile individually.

Add Reorder Point Column to Compound Queue

The *Reorder Point* column is now an available option in the **Compound Queue** display grid at **Workflow > Compound Queue**.

Adding the *Reorder Point* column to the **Compound Queue** can help the compounding team review inventory levels to create the most efficient batch size to fulfill the current Rx and replenish shelf stock within a single batch if necessary.

Pharmacy Spotlight

Bruno Tching – Inland Pharmacy

As owner of San Diego's Inland Pharmacy, Bruno creates a culture of collaboration with both patients and healthcare providers. He upholds dynamic collaborative practice agreements and works to connect pharmacists with physicians through nationwide networks such as CPESN. Recognizing the significance of collaboration, he envisions improved results through shared efforts.
