## Product News & Features

### Community Pharmacy Management Software

#### Add Remaining Deductible Amount to Rx Transaction Search

The *Primary Received Edi Accumulated Deductible Amount*, *Primary Received Edi Remaining Deductible Amount*, and *Primary Received Edi Amount Applied to Periodic Deductible* data fields are now available on the **Rx Transaction Search Expanded**, **Expanded with Comments**, and **Financial** grid layouts.

#### Add Call When Ready Filter to Patient Advanced Search

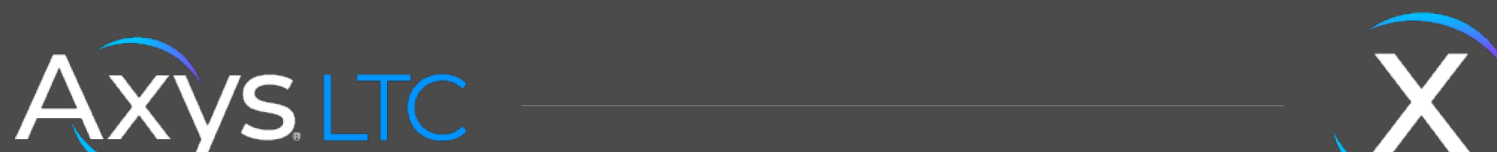

A new Search Filter for the *Call When Ready* data field is now available on the Patient Advanced Search.

Your pharmacy can generate a list of patients who meet specific criteria, including the option to Call When Ready. It can also assign a custom Care Goal from the **Actions Menu** to consult your patient on moving to SMS Notifications.

#### Update to Procedure Modifier Code Area

A new *Medical Billing* area is available at **Location > My Location > Rx Options > Medical Billing**.

When entering a Procedure Modifier Code for a claim submission, the user can search for a specific code, choose from the list of codes active in the location options, or select a predefined group of codes.

### LTC Pharmacy Management Software

#### Enhanced Test Claims Feature

The recently added Test Claims feature has been further enhanced with the ability to resubmit when a test claim is rejected. If the test claim requires a DUR or a claim code, the user can now quickly edit the details, save, and resubmit the claim.

#### Enhanced Workflow Queues

The following updates were completed to enhance the workflow process:

- Delivery queue – added "Physical totes only" filter checkbox
- Intake queue – updated the Type column with a list filter, instead of free text option

#### Enhanced Workflow Dashboard

New enhancements have been added to the Workflow Dashboard to increase user efficiency:

- Added click functionality to the bar charts to display the selected workflow grid below
- Added the ability to return workflow records, per workflow queue, based on the selected filters within the Workflow > Date and Delivery Run drill-downs

#### Enhanced Cycle Fill Preview

Sort and filter options have been added to the Cycle Fill preview screen, including additional columns for:

- Anniversary Cycles – new Estimated Refill column
- Anniversary and Calendar Cycles – new NDC, Item Status, PRN, Dose Amount, Daily Frequency, Quantity per Day, and Set Fill columns
