

## COMPANY ANNOUNCEMENT

### Crucial Update: Email Mandate in Service Pack 47

As part of our ongoing commitment to security and move to a Common Identity Service (CIS), a unique email address for each QS/1 user will be mandatory starting with Service Pack 47. Employees without an email address saved to their employee profile will be unable to access QS/1 applications after installing SP 47.

You can explore further details regarding this email mandate and its significant advantages for security and user experience in our fact sheet.

## PRODUCT NEWS & FEATURES

### + Add Tare Weight and Tare Balance Fields to Compound Reports

The *BatchDetailTareBalance* and *BatchDetailTareWeight* data fields have been added to the **Batch Logged Formula Worksheet** and **Compound Batch Details** report templates.

Adding these values will allow the pharmacy to include more detailed weight details on compounds reports.

### + Add Service and Residence Type Fields to Rx Search Report Template

The *PrimaryThirdPartyPharmacyServiceType*, *SecondaryThirdPartyPharmacyServiceType*, and *SecondaryPlaceofResidenceType* data fields are now available on the **Rx Search** report template.

These additions will allow a combo shop pharmacy to review claims and confirm billing details that may affect reimbursement amounts.

### + Add Item Last Received Fields to Prescription Lost Profit Rxs Template

The *LastReceivedSupplierName*, *LastReceivedSupplierInvoiceNumber*, *LastReceivedInvoiceDate* data fields are now available on the **Prescription Lost Profit Rxs** report template.

Adding the last received invoice details to the report will allow the pharmacy to consider the item source which may indicate an expected rebate or specific ordering strategy that should be considered when analyzing profit.
