About This Webinar

As enterprise threats proliferate in type and scope, phishing threats maintain their position as a top concern for organizations of all sizes. Phishing attacks have grown in sophistication, so much so that traditional approaches to email security are no longer sufficient to prevent the most dangerous attacks — those designed specifically to target particular organizations as well as individual users.

Join us for an unmissable live digital session exploring the agenda below.

Agenda

- Phishing and AI: bolstering your resilience in the new era of disruption
- Culture, technology and process: taking a multi-layered approach to Zero Trust
- Guidance for security and risk professionals from The Forrester Wave™: Enterprise Email Security, Q2 2023 report
- How America's leading enterprises are leveraging cloud-native security and AI/ML to stay protected

Jess Burn

Senior Analyst, Forrester Research
