

1. Siemens Energy announced on Tuesday, February 3, that it is investing \$1 Billion in the United States to expand manufacturing to meet the country's unparalleled surge in electricity demand. The announcement was accompanied by a media blitz with Christian Bruch sitting for interviews with print outlets like the New York Times, Wall Street Journal and Reuters and broadcast outlets Fox Business and Bloomberg TV. Every outlet that Christian spoke to ran a story. Simultaneously, Matt Neal was doing interviews via satellite with television and radio stations in the states where we made these investments – 15 in total. You can watch a sampling from Mississippi, North Carolina, Florida, Alabama, New York and Texas. Thus far, we have counted 51 total stories across media in the United States. This effort was amplified by a social media campaign which drew attention from all corners of the world. We received a message of support on X from the White House, quotes from the Governors of North Carolina and Mississippi and countless local officials in the areas where we are investing.
2. The fifth and final offshore wind farm — Sunrise Wind — that was ordered to halt construction by the Interior Department in December, citing “national security” concerns, is allowed to continue construction after a federal judge ruled in favor of the farm on Monday. As a reminder, three of the five wind farms utilize Siemens Gamesa wind turbines. “It is the wrong timing to ask about spin-offs,” Siemens Energy CEO Christian Bruch said in an interview with [Reuters](#) on Tuesday, February 3, touching on the state of wind in the United States. Bruch offered a comparison to Siemens Energy's grid business, which saw its profit margins rise from 3.6% in 2022 to 15.8% in 2025. "If we look back to 2020, and if you recall how the grid business looked, nobody ever believed that this could be the business with the best profitable growth of the company. And just four years later, it really turned ... around," Bruch said.
