LOS ANGELES, March 12, 2020 /PRNewswire/ -- Mathnasium Learning Centers now offers face-to-face, expert instruction from the comfort of customers' own homes. **Mathnasium @home** features the same experience with highly trained instructors and Mathnasium Method™ as in learning centers, but live, through a computer.

Initially slated to roll out across the U.S. and Canada over the course of 2020, Mathnasium @home's nationwide launch was expedited due to increased public demand for education at home. Thousands of students have already experienced the new service.

Changing Lives Through Math.™

Mathnasium @home allows students to keep up, catch up, or soar ahead in math from anywhere with an internet connection – live, with expert instructors using the same Mathnasium Method™ as in learning centers. And it costs no more than traditional enrollment.

"Mathnasium @home began as a way to serve customers whose busy schedules make it difficult to bring their children into the centers consistently," said Mathnasium President David Ullendorff. "But given current concerns about public health issues and potential school closures, the public is especially eager to enjoy the Mathnasium Method™ live from remote locations.

"Three years of pilot testing proved that Mathnasium @home gives our students all the benefits of our in-center learning sessions, so we've worked to accommodate both our customers and their communities as quickly as possible."

As of the beginning of 2020, Mathnasium @home had been deployed in approximately 200 learning centers across North America. Independently owned franchisees will choose when to launch Mathnasium @home for their local communities.

Just like at a local learning center, students attend their live sessions an average of 2-3 times per week to work on a personalized learning plan. Because students are enrolled through their local Mathnasium Learning Center, they can participate in its local events and rewards program.

The cost of Mathnasium @home is the same as traditional center enrollment, and anyone with an internet connection can take advantage of the service.

Both in the centers and online, Mathnasium students boost grades and scores, learn critical-thinking and problem-solving skills, and gain self-confidence that transform their understanding and appreciation of mathematics.

To find a center currently offering Mathnasium @home, go to [mathnasium.com/at-home](http://mathnasium.com/at-home).

### **About Mathnasium**

North America's leading, math-only supplemental education franchise, Mathnasium teaches math so that children understand it, master it, and love it. The Mathnasium Method™ has transformed the lives of children in grades 2-12 since 2002. With more than 1,000 learning centers worldwide, Mathnasium is ranked #2 in Forbes' Best Franchises to Buy in America for 2019.
