

Animated YouTube Video for Kids

Title: *Why Do Giraffes Have Long Necks?*

Target Age: 4–7

Length: ~1.5 to 2 minutes

Tone: Playful, curious, educational

SCRIPT START

[Opening scene: Bright animated savannah landscape, cheerful music plays]

NARRATOR (friendly, warm voice):

Hey there, curious minds! 🧠

Today, we're going on a *wild* adventure to meet one of the tallest animals on Earth...

[Cut to tall giraffe munching on leaves]

NARRATOR:

Say hello to... the giraffe! 🦒

Whoa — look at that *long* neck! But... have you ever wondered *why* giraffes have such tall necks?

[Zoom in on giraffe's neck stretching up to reach tall tree leaves]

NARRATOR:

Well, one reason is that giraffes love to eat leaves from tall trees, especially acacia trees. Their long necks help them reach food that other animals just *can't*. Talk about a sky-high snack!

[Cut to two giraffes playfully "necking" or gently bumping necks]

NARRATOR:

But wait, there's more!

Giraffes also use their necks to say, "Back off, buddy!"

When two boy giraffes want to show who's the boss, they have a neck-wrestling contest!

It's called... **necking!** (Yep, that's a real word!)

[Cut to giraffe standing tall, looking proud]

NARRATOR:

So, giraffe necks aren't just for eating, they're for *competing* too!

Pretty cool, huh?

[Cut to baby giraffe looking up at tall tree]

NARRATOR:

From baby giraffes to grown-up giants, their long necks help them stay strong, reach high, and look out for danger across the plains.

[Closing screen with giraffe waving and saying “See you next time!”]

NARRATOR:

Thanks for exploring with us today!

Don't forget to like, share, and subscribe for more fun animal facts.

See you next time and stay curious! 🙌🦒✨

Sound effects: munching leaves, animal sounds, playful music

Pop-up facts or questions like: “How tall do you think a giraffe is?”

A recurring character host (like a talking monkey, owl, or explorer kid)
