To reach New England with the Gospel, *every town and every neighborhood* must have a healthy church.

*H*ow will we get there? The answer is simple: **by planting more churches.**

The BCNE supports church plants in every step of their development through regular **training** and **accountability.**

But **existing churches** are also a **vital** part of the process. Church plants and replants **desperately need** sending churches, partner churches and sponsor churches to **mentor** them and help them **thrive.**

As these new churches mature and become self-sufficient, they **multiply** our Gospel effectiveness by helping other church plants.
