## SUMMARY

Results-driven Architectural Technologist with a BSc (Hons) in Architectural Technology and certifications in interior design and automation. Expertise in AutoCAD, Revit, and BIM supports a strong foundation in sustainable design principles and architectural detailing. Proven experience in architectural design assistance and 3D modeling translates complex concepts into precise designs. Committed to achieving CIAT chartered status while contributing to innovative architectural projects that prioritize sustainability and creativity.

## SKILLS

- Architectural software
- 3D Modeling and Design
- Building Technology
- Project Management
- Communication Skills
- Problem solving
- Time management
- Conflict Management
- Leadership skills
- Teamwork
- Integrated Project
- Adaptability
- Analytics Skills
- Photoshop
- Microsoft Office Suite
- Site appraisals

## EXPERIENCE

06/2021 - Current

### Door Supervisor (Part Time)

UK protection - Nottingham, United Kingdom

- Monitored security cameras to identify and respond to suspicious activity.
- Problem-solving and quick decision-making.
- Searched bags manually to identify prohibited items and contraband.
- Greeted and monitored customers entering the premises.
- Patrolled crowds during events to preserve order and promote security.

05/2019 - 02/2020

### Assistant Architectural Designer

Arch. Farina studio - Bergamo, Italy

- Contributed to projects from concept to completion with architectural drawing, model, and design document development.
- Enhanced design accuracy with detailed AutoCAD drawings.
- Mitigated design and structural issues early, reducing rework by 30%.
- Achieved a 95% approval rate on initial submissions by clients and regulators.
- Achieved a 20% increase in client satisfaction scores.

10/2017 - 03/2019

### Mechanical Maintenance

F.I.S.E SPA - Bergamo, Italy

- Implemented troubleshooting measures and proactively resolved equipment issues, contributing to a more efficient production environment, and sustaining high output levels.
- Effectively managed team resources and project timelines, coordinating personnel and materials to meet production goals on schedule and within quality standards.
- Maintained high standards of quality control through rigorous inspection of products, reducing defect rates, and enhancing product reliability in electric domestic machines.

- Led shift operations as the primary technician, overseeing equipment servicing and repairs, ensuring uninterrupted production flow, and minimizing downtime.

**05/2016 - 10/2017**

**Printer engineer**

**NTS Nuova Termo Stampi** - Bergamo, Italy

- Streamlined workflows to boost production efficiency by 20%.
- Achieved high standards in product finish with meticulous sanding and polishing.
- Maintained and serviced a range of printers, reducing downtime by proactively identifying and resolving equipment issues, which improved overall production reliability.
- Evaluated customer printing needs to deliver customized solutions.

**03/2014 - 04/2016**

**Printer Engineer**

**FHP FREUDDENBERG S.A.S** - Roncello, Milano

- Punching machine operator for the creation of domestic plastic utilities.
- Improving the production process.
- Cleaning, sanding, and polishing finishes the product.
- Setting up machines and scheduling print job
- Updating paperwork.
- Set up printing software for cross-platform compatibility.
- Leveraged technical skills to create new product solutions.
- Designed engineering experiments.

**03/2014 - 04/2014**

**Mechanic Designer**

**VITALI S.P.A** - Bergamo, Italy

- Designing some mechanical structural elements for the machine that makes steel chains with various dimensions.
- Developed CAD designs for mechanical structures, focusing on the accuracy and alignment of specifications for architectural and structural purposes.
- Converted conceptual sketches into precise CAD files, providing foundational designs for product and project applications.
- Collaborated with team members to enhance design workflows, and streamline processes for improved output.

**03/2011 - 11/2012**

**Technician machinery**

**BREMBO S.P.A** - Curno, Bergamo

- Decreased equipment maintenance costs by 10% through proactive monitoring and cleaning of production machinery, preventing breakdowns, and extending machinery lifespan.
- Boosted production line efficiency by 15% through optimization of high-pressure jet washing techniques.
- Ensured 95% quality compliance through meticulous production line control.

## EDUCATION

**06/2024**

**BSc (Hons): Architectural Technology**

**De Montfort University** - Leicester

## HOBBIES AND INTERESTS

- **Traveling** – Inspired by global architectural styles and diverse cultural influences, which inform my approach to sustainable and innovative design.
- **Cycling** – Avid cyclist who appreciates urban design and city planning, with a keen eye for how infrastructure impacts community and accessibility.

- **Architectural Drawing** – Passionate about sketching and conceptualizing building structures, honing my skills in design detailing and visual.
- **Formula 1** – Enthralled – Passionate about sketching and conceptualizing building structures, honing my skills in design detailing and visual architectural technology.

## VOLUNTARY EXPERIENCE

- Camp counsellor, Camp Hilltop, Hancock, New York State, USA, 06/01/22, 09/30/22
- Advocate sustainable environmental society. De Montfort University, 06/2024

## CERTIFICATIONS

### Nottingham Trent University September 2020- December 2020

- Short course Interior designer Modules: -Photoshop -Elevation plan drawing -Cool and warm color

### Confindustria, Bergamo Italy 2012 – 2013

- Certificate in Superior Technician Automation

### I.T.I.S. Pietro in Bergamo, Italy September 2007 – June 2012

- Electronics Technician and Telecommunication

### I.T.I.S. Pietro in Bergamo, Italy September 2008 – June 2010

- Certificate in Qualification Electronic Operator

## AWARDS

### Chartered Association Of Building Engineers

- CABE Award (Best Final Year Student 2024)
