- Makes use of high-quality Nespresso VertuoLine capsules that deliver the ultimate coffee flavor – just the way you like it
- Comes with 5 brewing options
- Automatically switches off after 9 minutes from the last use
- Comes with a Nespresso VertuoLine capsule welcome kit

Performance

One of the unique selling points of this amazing coffee maker machine (amazing, because you don't come across such wonderful pieces frequently) is that it is powered up by centrifusion technology. This unique feature enables the machine to brew both Espresso and Coffee on the go – on the single touch of a button.

What's more, the machine comes along with 12 different Nespresso Grands Crus capsules. Out of these 12, 4 are espresso while the remaining 8 are for brewing a cup of coffee. Breaking these 8 capsules down further, 4 capsules vary on the basis of their intensity – bold to mild. The two of them are flavored roasts: hazelnut and vanilla.

When we are talking about its performance, we feel that it is important to talk about its working. The VertuoLine centrifusion technology which this coffee maker is based on is different from Original Line Nespresso machines. For starters, Original Line machines made use of 19 bar pressure to extract the coffee. Adopting a bit different route, VertuoLine centrifusion technology works by spinning the capsule to extract the coffee flavor, which works really well!

Another great feature that caught our attention is its quick heating time. This Nespresso unit can attain the desired temperature within 15 – 20 seconds, regardless of the size of your coffee cup. This ensures that you don't have to wait for a long time to brew your coffee.

And no, the coffee maker is not tough to use. In fact, it is one of the simplest coffee machines that we have come across so far. The use of the latest technologies has only added to its convenience and versatility. To prepare your coffee, all you need to do is set the cup support in accordance with the size of your coffee cup, and press the button on top to activate the machine.

As soon as the indicator button starts glowing, open the machine, and insert one of the Nespresso Evoluo pads that the machine comes along with. Next, close the machine and lock it properly. Relax, and press the button – you will have piping hot coffee ready almost instantly. While the cup of espresso will take about 20 seconds, you will have to wait for 40 seconds to have a cup of coffee.

So, here is an obvious question – how will this Nespresso Evoluo machine know if you need an espresso or coffee? Don't worry; the in-built barcode reader takes care of it for you. As soon as you preheat the machine, and lock the lever in place, the barcode scanner determines what kind of coffee you are making depending on the capsule inserted. Didn't we say that this is one of the most easy-to-use machines that we have come across so far?

Taste

As we discussed above, Nespresso Evoluo makes use of centrifusion technology which spins the Nespresso capsules. As Evoluo doesn't allow you to use any other pods apart from the Nespresso capsules, the taste is definitely nothing short of the best. The flavor that you get is highly-rich. The crema that this machine produces looks awesome too.

But on the downside, although crema looks tasty, it is not exactly a true crema. It is thin and too foamy and lacks the right texture.

As far as the quality of the resulting coffee is concerned, although it tastes great and all, it is not something which espresso-only machines produce. Keeping in mind that the machine solves both the purposes single handily, we will like to mention that quality is definitely above average and you will not be disappointed.

Cleaning and Maintenance

The Nespresso Evoluo machine scores really well in terms of cleaning and maintenance. The machine doesn't require you to perform cleaning now and then. There are no short term cleaning requirements, as such. All you need to do is empty the bin where the spent capsules are collected periodically.

The machine comes with a specific descaling process that you need to follow. Although the entire process is easy to accomplish, it is time-consuming. On average, it will take you around 30 minutes from start to finish.

Specifications

- Capacity: Water tank has a capacity of 54 oz.
- Materials: High-quality plastic
- Dimensions: 9.0 W" by 12.2 D" by 12.3 H"
- Weight: 11 pounds

Cost

This Nespresso Evoluo coffee and espresso machine have a maximum selling price of \$199.

Pros

- An array of capsule sizes and roasts allow you to enjoy your coffee the way you want
- Easily customize your drink size from 0.30 oz. to 17 oz.
- Simple and easy user interface

Cons

- Only compatible with Nespresso capsules
- The foamy texture of crema might not go well with various coffee lovers

Reasons to Buy an Evoluo

Undoubtedly, there are more than one reasons for buying a Nespresso Evoluo, these include:

- Good coffee quality and taste
- Compact and beautiful design with an attractive finish
- User-friendly interface
- Easy to clean and maintain
- Auto shut off after 9 minutes of last use
- Quick heat-up time of around 15-20 seconds
- In-built capsule container discard bin

Reasons Not to Buy an Evoluo

Although this coffee maker machine is great and all, it has a few limitations which might prove to be bothering:

- Evoluo only supports VertuoLine capsules. This means that you cannot use any other coffee pods.
- The temperature of the coffee produced is another limitation. It might not be as piping hot as you might expect, but it was just perfect for us!

Frequently Asked Questions

1. Does this machine come with 12 free pods?

That's correct. As a part of a complimentary gift, the machine comes with 12 free Nespresso pods to help you get started.

2. Can I make my own pods kits?

No, Evoluo is not compatible with any other pods apart from the Nespresso capsules.

3. How many bars of pressure does this machine use?

The machine doesn't use bars of pressure to brew the coffee. Instead, it uses centrifugal technology that spins the pods 7,000 times a minute to provide you with the best flavor.

4. Does this machine also come with a glass mug as is shown in the picture?

No, you will have to purchase that separately. However, Evoluo does come along with a starter pack of 12 Nespresso capsules in different flavors which is nothing less than a steal deal!

5. Is Nespresso coffee hot?

Although not burning hot, the coffee produced is just of the right temperature!

6. What is the difference between Nespresso Evoluo and Nespresso VertuoLine?

The only basic difference between these two machines is that the Voluo is the upgraded version of the VertuoLine. Else, both machines are almost the same and use the same technology.

Wrapping Up

All in all, this Nespresso Vertuo Evoluo is what every coffee lover is looking for. Its ability to provide you with both coffee and espresso is what makes it unique.

Thankfully, you no more have to prefer one over the other (we know how hard it is to

choose between two things that you absolutely love!), and you can have both of them altogether, all thanks to this machine.

The Nespresso Evoluo flaunts an easy-to-use interface and brews your cup of coffee on the single touch of a button. The in-built barcode scanner ensures flawless execution. The result - you get a tasty cup of coffee and espresso every time.

The Nespresso coffee maker is easy to clean and maintain, as well. However, all these added features come at a price. The machine is a bit expensive, but it is worth every penny!
