Innovia Medical Announces FDA Clearance of Sterizone VP4 Sterilization Process

Contact: Jen Hedtke, 651.789.8166, jhedtke@innoviamedical.com

ST. PAUL, Minn (4/1/2022) — Innovia Medical is pleased to announce that the Sterizone VP4 Sterilization Process has received clearance from the United States Food and Drug Administration (FDA) under 510(k) number K210836.

The Sterizone VP4 Sterilization System is an advanced low-temperature sterilization solution that quickly processes heat and moisture-sensitive surgical instruments using vaporized hydrogen peroxide, an environmentally friendly sterilant. This system is ideal for today's advanced surgical tools that cannot withstand the high temperatures required in traditional sterilization methods.

"There is increasing demand for low-temperature sterilization as an alternative for delicate, high-tech surgical instruments that can't tolerate traditional high-temperature processes. The Sterizone VP4 is the solution of choice for these tools," said Aaron Lieberman, Director of Sales and Marketing at Innovia Medical.

In addition, [InstruSafe Instrument Protection Trays](#) from Innovia Medical provide 360-degree protection for surgical instruments during sterilization, transportation, and storage. The trays are validated for both steam and low-temperature sterilization cycles and can be customized in any shape or size to meet specific needs.

InstruSafe Trays have 510(k) Clearance for each sterilization cycle. View the clearance [here](#). For more information, visit our website or contact Customer Service at customerservice@innoviamedical.com.

[About Innovia Medical](#)

Innovia Medical is a family of specialty surgical companies that are passionately committed to partnering with medical professionals to help elevate the delivery of patient care and improve clinical outcomes. Innovia Medical companies develop, and manufacture solutions designed to deliver quality care. Our goal is to save time for both the medical professional and patient, provide a consistent and predictable care experience, and improve patient confidence with reduced recovery times and minor discomfort. Innovia's mission is to improve outcomes for the global healthcare community and the patients they serve through innovative solutions that elevate the delivery of care.

[About Summit Medical](#)

Summit Medical, headquartered in St. Paul, Minnesota, is a medical device manufacturer serving the global healthcare community for over 35 years. The company is committed to staying on top of industry demands and developing solutions to meet them through design, engineering, and manufacturing stages.

Summit Medical works closely with surgeons, nurses, and allied healthcare professionals to develop unique, patented products that improve surgical outcomes and make the delivery of healthcare more efficient. Most Summit Medical products are manufactured and packaged in-house and sold by a global network of independent specialty distributors supported with a complete marketing program.
