**FOR IMMEDIATE RELEASE: 3/1/2020**

### **Doosan Powers Up with New Electrics at MODEX 2020**

The material handling world is set to be thunderstruck with the industry debut of Doosan's new line-up of electric warehouse products, which will be showcased at MODEX 2020. As the premier supply chain tradeshow, MODEX is the ideal platform to highlight the new -9 Series products, including a Stand-Up Rider, an Order Picker, an End Rider and a new Reach Truck.

According to Doosan Industrial Vehicle America Corporation's (DIVAC) CEO, Tony Jones, "MODEX gives us the opportunity to reach a broad cross section of industry decision makers. We are excited to bring these products to this show at this moment."

This year, DIVAC's participation and support extends beyond the booth. As a proud sponsor of the Women in Supply Chain Forum, "We are thrilled to be sponsoring this event and to be a part of the growing movement to empower all to find success within the material handling industry," Trena Harris, General Manager of Human Resources stated. The afternoon forum will be filled with education, discussion, and networking for women in the industry on March 9, 2020.

DIVAC is also a Designated Exhibiting Sponsor for MODEX's Student Day. "Our mission is to teach and train, helping shape and change the minds of the younger generation coming into the workforce, keeping the ever-growing supply chain alive," states Doosan Product Manager, Andre Marshall, who will greet and present the students with valuable insight regarding how Doosan fits in the supply chain and career paths in the industry.
