## TDIndustries in North Texas

TDIndustries' inception traces back to North Texas — specifically, to a small air conditioning distribution company on Canton Street in downtown Dallas in 1946. In the decades that have followed, TD has grown into one of the nation's premier mechanical construction facilities and service companies, with more than 2,300 TDPartners (TD's employee-owners) and eight locations in Texas and Arizona.

Our three offices in North Texas — Dallas, Fort Worth, and Richardson — work together to respond to the demanding Dallas/Fort Worth marketplace. We partner with clients to address their needs, from mission-critical solutions to ongoing maintenance services. We believe in “life-long, life-cycle relationships,” so you can rely on TDIndustries to be your “go-to” partner for all your mechanical construction and service needs.
