WRITTEN LANGUAGE

You may run into Aurebesh, the most common written language in the *Star Wars* universe. The language was originally created for the 1991 game "*Star Wars Miniature Battles*" by Stephen Crane. Since then, the language has been used in countless *Star Wars* properties and can be seen all over Batuu – from stone carvings to Cast Member nametags.

■ If you are not familiar with the language, the Play Disney Parks app allows you to scan Aurebesh words to obtain their English translation.
