

# FUN WITH FLORALS

It's all about creeping vines, pretty pink roses and fields of gold! Rhea Dhanbhora brings you a few pieces to help you rock this year's floral décor trend

**D**écor this season is summery, bright, colourful and all about being footloose and fancy free. Think of rose gardens, lilac stems and big floral designs running across your pillows and curtains. Sounds like too much? It isn't! A big trend this season is the granny floral print, which is exactly what it sounds like — cosy spaces that are suffocating under the strain of floral doilies and valances. The trend has moved from furnishing to furniture — that's right, pieces that are a big commitment to the trend instead of just a throw pillow or a sheer curtain. Take a look at what you could add to your space to get on board with the trend — but remember not to overdo it!
