

## Anthropologie Icon Juice Glasses: A Charming Touch for Every Shelf and Sip

Anthropologie is known for its effortlessly chic homeware that blends retro nostalgia with modern elegance, and their Icon Juice Glasses are no exception. These glasses are a delightful nod to vintage glassware, featuring whimsical, embossed motifs that make even a simple glass of orange juice feel special.

With a playful yet sophisticated design, each glass showcases unique adornments—ranging from celestial symbols and delicate florals to holiday tributes—adding both texture and personality. Sold individually, no two are exactly alike, making your collection truly your own.

The clear, hand-blown glass construction keeps them versatile, seamlessly fitting into any aesthetic. They're the kind of pieces meant to be displayed on open shelving—perfect for those who appreciate a little extra beauty in the everyday.

Despite their delicate appearance, they feel surprisingly durable. Holding 17.25 oz., they're ideal for a morning juice, a refreshing iced coffee, or even a trendy cocktail with friends. However, if you prefer larger pours and fewer refills, their stout proportions might feel a bit small.

At \$16 per glass, they lean toward the pricier end of drinkware, but their quality and charm make them a delightful splurge—these glasses deserve every cheers!
