Graduate Project Focus

The mental health of parents navigating their children's medical oncology journey is often a neglected design criterion. Architecture cannot cure mental health challenges, but it can provide a moment of pause and reflection in their new version of normal life. The use of positive distractions through architectural form can be a step toward creating healing moments in the lives of these families.

Employment History

Architectural Intern, TSP Inc, Rapid City, SD

May 2023 - August 2023

Architectural internship involving job walks, picking up red lines, pay app review processing, taking notes in client meetings, parking studies, and site master planning in a multi disciplinary environment.

Design Build Team Member, IDB, Moscow, ID

August 2023 - August 2024

Vandal Healing Garden and Memorial

Architectural and construction project from start to finish including communication with the public, design process, presentations to clients, construction drawings, construction methods, and construction management.
