Quarterly Bulletin for OT and OTA Educators

Q4 2024 Edition

Why Precision Education May Be the Way of the Future—Download Free Educator Guide

Precision education (PE) is seen as the future of medical learning, recognized as a key driver in ensuring equitable and high-quality patient care. PE emphasizes performance assessment but prioritizes the “why” rather than “how” it is done, and is seen as key to reshaping healthcare education and ensuring equitable, high-quality patient care. [Read our blog](#) to know more about PE and [download a free Educator Guide](#) for three proven ways faculty can implement precision learning in occupational therapy education.

Latest News and Updates

Drive NBCOT® Certification Exam Success with a Data-Powered Precision Learning Solution

Last year, TrueLearn helped over 50 OT programs deliver high-quality content backed by learning science across the curriculum to elevate learning and end-of-program outcomes. Supported by a powerful data analytics engine, TrueLearn surfaces actionable insights and longitudinal data, allowing educators to close curricular and knowledge gaps, spot at-risk students early, and ensure students are ready to achieve a first-time pass.

Minimize Student Attrition, Maximize NBCOT® OTR® Pass Rates

NBCOT® OTR® first-time pass rates have remained low in recent years. Coupled with student attrition, this further amplifies the national shortage of occupational therapy professionals if the obstacles are not overcome. What can OT programs do? Our new whitepaper deep dives into proven solutions to minimize student attrition and optimize exam and program outcomes.
