

THE DOUBLE BAKED DIFFERENCE

Hoping to break away from the pack with something new, we at Double Baked found our answer by looking to the past. Inspired by our favorite desserts' simple flavors and whole ingredients, we developed a line of delicious, comforting treats infused with a different kind of fire. At Double Baked, it's our pleasure to help create warm and delicious memories, one bite at a time. Our commitment to tasty treats starts with two key areas:

TASTE

We envision a better kind of edible experience with a flavor you have to taste to believe. Say goodbye to the cannabis after-taste, and hello to flavors like dark chocolate, cheesecake, and s'mores. Our line goes through many rounds of taste testing to ensure our products are as delicious as they are elevating.

DEPENDABILITY

Meticulously tested for quality, flavor, and consistency, Double Baked delivers delicious, comforting treats one 5mg bite at a time - All the time. We hold ourselves to the highest industry standard for making sure that each batch is perfectly baked.

TWICE AS TASTY, TWICE AS BAKED

We set out to create tasty edibles that embody comfort food with a twist. Double Baked edibles evoke warm, comforting nostalgic flavors packed into every bite. Each batch is carefully tested to ensure quality and taste are up to our rigorous standards.

WHAT'S IN THE CAN

Double Baked edibles offer classic flavors reminiscent of our favorite traditional desserts. Our focus is to create truly delicious chocolate treats to be enjoyed during quiet moments, with no lingering distillate taste. So what are our core flavors?

Cake Batter Cheesecake - Luscious white chocolate with cake batter flavor blended with pop rocks

Dark Chocolate Cheesecake - Rich dark chocolate and crunchy graham cracker crumb topping

S'Mores Cheesecake - The classic campfire flavors of chocolate, marshmallow and graham crackers

Strawberry Cheesecake - White chocolate with fresh strawberry flavors and graham cracker crumb topping

Ingredients Sourced Responsibly - Double Baked chocolates are made with Cacao Trace, a sustainably sourced method that produces high-quality chocolate while benefiting cacao farmers. All of our ingredients are certified Fair Trade and are made with the best quality natural and organic cannabis.

Dosage - 5mg per piece Adult Use/Med. 25mg per piece Med Only

Start Low Go Slow - Edibles can take up to a couple hours to set in. If you're new to cannabis edibles start with a single piece and wait at least that long before deciding if you want to try another.

Processed differently by the body - When eaten, THC is processed by the liver where it's converted to 11-hydroxy-THC. It is believed that in this form, THC actually becomes MORE bio available than when smoked. Which explains why the effects can take much longer to kick in but can hit so hard once they do.

Additional Formulations - In addition to our standard "Hybrid Effect" chocolates, we also offer other formulations featuring specific cannabinoids and effects:

Delta-8:Delta-9 1:1 - Delta-8 THC is reported by users to produce mental clarity, focus and energy while Delta-9 THC is the primary cannabinoid that gives cannabis its psychoactive effects.

CBD:Delta-9 1:1 - CBD is reported by users to help mitigate pain and inflammation and help regulate mood while Delta-9 THC is the primary cannabinoid that gives cannabis its psychoactive effects.
