# Intro to Gridiron Grades

We have recently launched a community-focused website designed for football enthusiasts called Gridiron Grades!

The website provides a platform for users to create, share, and view NFL player ratings, scouting reports, and NFL Draft prospect rankings.

Here is a summary of the websites five main features:

**Rate Your Favorite Team** The rate your favorite team feature allows users to give their very own quick hitting analysis of their favorite team for every game as they will be asked to provide ratings on a scale of 1-10 on every player's performance from that week. Didn't watch the game closely enough to rate every offensive and defensive player? No worries! Users will not only have a "Mark Unsure" option but will also be given a filter option to select which side of the ball or position groups they would like to rate that week.

**Player Ratings** The player ratings feature gives users the opportunity to provide their own personal ratings for players all across the NFL as well as NFL Draft prospects.

**Scouting Reports** Users can create and publish their very own detailed scouting reports for NFL Draft prospects and NFL players from all 32 teams. Users can choose from templates from the Scouting Academy, PFF, SIS Sports, or create their own. The user will grade the player on many different aspects of their position. This can include anything from a quarterback's pocket awareness to a safety's awareness in zone coverage.

**Draft Board** Users can create their very own NFL Draft big board and position rankings as well as view the community rankings with this feature.

**Community** Community aggregated ratings will be created using submissions from all users that will be accessible in the community feature.

# Intro to Google Sheet Database

Looking for more? [Sign up for the Gridiron Grades Google Sheet Database!](#)

The Gridiron Grades Google Sheet Database is the perfect way to follow the NFL. It will keep you up to date on free agency rumors and mock drafts during the offseason and provide background information on teams and players.

Here is an introduction to the features provided on the Google Sheets Database:

You can choose to sign up for a specific team's database or the NFL database (which is a combination of all 32 teams' database)

Each team database features the following:

**Free Agency Articles** This feature is where you can find free agency articles to read this offseason.

**NFL Draft Articles** This feature is where you can find mock drafts and NFL draft articles to read throughout draft season.

**Offseason/Training Camp Articles** This feature is where you can find offseason articles to read post draft.

**Player Profiles** Each player profile will include background info like age & draft status, contract details, 2023+2024 stats/ranks, and 2023+2024 stats chart (same as what is found in this guide). These player profiles will also expand to include Gridiron Grades community consensus ratings and position specific trait consensus ratings.

**Position Group Breakdowns** The position group breakdowns that are found on this guide will also be found here. They will include players' date of birth, age, draft status, and a year-by-year salary breakdown. This page will also include 2023 & 2024 player stat charts for players at that position.

**2024 Team Stats** This will include a variety of offensive and defensive stats. This includes basic stats like yards and points per game but also advanced stats from sites like Next Gen Stats, Pro Football Focus, and RBSDM.

**2024 Snap Counts** Snap count percentages for each player.
