tons of trash audited

How We Help Organizations Reduce Waste

Waste Compliance Services

Our Compliance services help organizations proactively identify waste-related risks, document safeguards, and demonstrate due diligence across regulated waste streams. These services are critical for clients operating in highly regulated regions, such as California, Washington, or NYC, and industries, such as healthcare, hospitality, retail, and large commercial facilities.

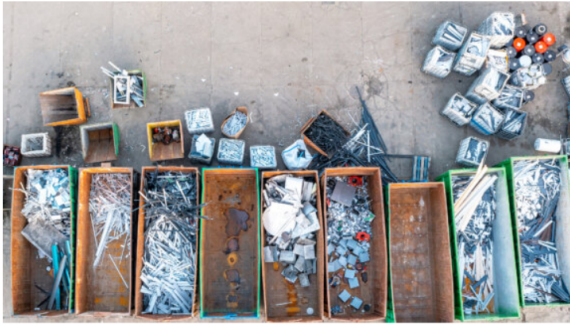

Zero Waste Services

Our Zero Waste services help organizations reduce landfill disposal through operational improvements, behavior change, and data-backed waste reduction strategies. We designed our program to be scalable across portfolios and achievable within 6–12 months, with measurable outcomes.

Real-World Results

Circularity

TricorBraun: A Study in Successful Waste Management

TricorBraun partnered with ENGIE Impact to develop a waste management program that would help them get to 90% waste diversion across key sites.

How We Help

Our team supports clients at every stage of their waste journey, from identifying compliance risks and documenting safeguards to implementing waste reduction programs and validating zero waste performance. We deliver hands-on services, including waste audits, waste characterization, roadmaps, implementation support, and third-party validations.

Our Difference

We combine on-site expertise, regulatory knowledge, and operational execution to help clients increase diversion, avoid fines, reduce costs, and demonstrate measurable progress toward sustainability goals.

knowledge, and operational execution to help clients increase diversion, avoid fines, reduce costs, and demonstrate measurable progress toward sustainability goals.

Our Work In Action
