

Sustainable Resource Management

ENGIE Impact expertly manages your resource data by collecting it from your invoices and other sources across your portfolio. We then convert it into actionable intelligence, helping you find cost savings, build resilient operations, and drive sustainability forward.

[Connect with ENGIE Impact](#) to manage your resource data.

Resource Management Solutions

Utility Expense Management

We provide the accurate, standardized resource data needed to gain powerful insights that support informed decision-making while mitigating the risk of utility billing errors and late fees. Utility Expense Management drives savings across a company's entire portfolio.

Waste Expense Management

We capture, analyze, and correct waste bills, ensuring they are paid on time. Integrated waste analysis, combined with pre- and post-payment audits, result in the most robust waste bill audit practices in the industry.

Telecom Expense Management

We optimize telecom spending for organizations through comprehensive audits, bill analysis, and usage reporting. Our services identify cost-saving opportunities, mitigate service disruptions, and enhance operational efficiency.

Renewable Energy

ENGIE Impact simplifies renewable energy procurement and management decisions by building upon decades of procurement experience. Our experts help you make sense of product and technology options, incentives, and complex market and regulatory environments.

Carbon Management

Our expert carbon analysts help you navigate the complexity of carbon accounting and GHG reporting, and provide expertise to deliver a comprehensive view of your carbon emissions. With a 100% success rate in data verification, we ensure compliance as sustainability standards evolve (CDP, WRI, GRI, GRESB).

Energy Supply Management

We optimize energy supply through expert negotiation, comprehensive analysis, and strategic procurement. Our services enhance cost-effectiveness, ensure supply security, and free up internal resources for core business functions.

Total Waste Management

ENGIE Impact provides

Energy Management

As energy management

Sustainable Waste Advising

Our Sustainability Waste

comprehensive waste management support, from conducting waste audits and ensuring regulatory compliance to managing vendors and developing comprehensive waste reduction plans.

specialists, we leverage data analysis, benchmarking, and strategic implementation to optimize energy performance. Our approach includes cost reduction strategies, financing options, and ongoing monitoring to drive sustainable and profitable energy outcomes.

Advisory team helps organizations reduce waste, stay compliant, and improve operational efficiency through practical, data-driven programs. Our core focus areas, Waste Compliance and Zero Waste, help organizations reduce risk, lower costs, and drive measurable sustainability outcomes.

Ellipse - Reporting Platform

Fundamentally shift the way your organization captures, analyzes, and models data to enable carbon-first decision-making and maximize the impact of market-responsive investments.
